81.99€

Puluz waterproof case for Insta360 X5 camera

The Puluz waterproof case is designed to be fully compatible with the Insta360 X5 camera, ensuring its safety even in extreme conditions. It features exceptionally high light transmission, a scratch-resistant PMMA lens with anti-reflective coating, a rugged case made of hardened PC plastic, and water resistance up to 60 meters deep. Thanks to a design that eliminates blind spots and the use of high-quality materials, this accessory is ideal for diving, swimming and other water sports, guaranteeing full camera functionality and clarity of recordings.

Perfect fit - a second skin for Insta360 X5

The case was created on the basis of the actual model of the Insta360 X5 camera, so it fits precisely to the Insta360 X5 and does not limit its capabilities. All buttons and design elements retain full

functionality, allowing comfortable operation even underwater. As a result, you can count on flawless operation of the camera in all conditions.

A lens that does not disappoint

Made of transparent PMMA material, the lens offers as much as 95% light transmission, and up to 98% when AR coating is applied. Additional anti-glare, anti-fog and anti-droplet coatings ensure maximum image quality in every shot. The AS coating protects against fingerprints and scratches, all with a hardness of 5H, comparable to glass.

Durability and style in one

The case is made of hardened polycarbonate (PC), which is covered with fine lines on the inside and outside. These lines not only give the product an elegant texture, but also increase resistance to mechanical damage. The case looks professional and also effectively protects against scratches, cracks and fingerprints. High-activity amorphous silicone was used to create the sealing ring, which ensures durability and flexibility even after many uses. The piece connecting the case to the back cover is made of 316 stainless steel, known for its corrosion resistance, as are the buttons, which are also made of this durable material.

Full transparency and panoramic shots

Thanks to its unique optical design and spherical lenses, the Puluz housing guarantees 360-degree coverage with no blind spots. This means you can record fully stitched, panoramic shots without any distortion or interruption of the image even underwater.

Dive up to 60 meters deep

Record phenomenal underwater footage with your Insta360 X5 camera with maximum safety. The housing offers a waterproof rating of up to 60 meters, making it the perfect choice for lovers of diving and all water sports. Thanks to the use of liquid silicone technology and precise seal design, you can be sure that your camera will be completely protected from water. With the Puluz housing, you can use your camera to its full potential - even where conditions are most challenging.
