Neewer MS60B BI-COLOR LED Light

The NEEWER MS60B BI-COLOR light was designed for creators who expect professional lighting both in the studio and on location. With an adjustable color temperature of 2700K-6500K, high brightness, and as many as 12 special effects, you can easily adapt the lighting to the mood of any scene. The lightweight metal construction with a comfortable handle makes the light ideal for mobile shoots, and the quiet cooling system allows you to work without interruptions even during demanding productions. Rounding out the package is wireless control via an app and broad compatibility with light modifiers thanks to the Bowens adapter.

Precise lighting with wide adjustment

The NEEWER MS60B offers smooth color temperature adjustment ranging from 2700K to 6500K, allowing you to effortlessly create both a warm, cinematic atmosphere and cool, neutral light for professional projects. High CRI 97+ and TLCI 98+ ratings ensure accurate color reproduction, which

is crucial for product photography, portraiture, and video work. The light uses linear PWM technology, which allows you to adjust the brightness from a true 1% all the way up to 100%, without artificially limiting the power at the lowest settings. Additionally, the light remains flicker-free even at short shutter speeds down to 1/2000 s, which filmmakers and content creators will particularly appreciate.

High power in a compact housing

Despite its small size, the MS60B can generate an impressive brightness of up to 40,000 lux at a distance of 1 meter and even 110,000 lux at 0.5 meters. The aluminum housing ensures high durability and effective heat dissipation, while the entire unit weighs only about 700 grams, allowing you to comfortably carry and use the light during mobile work. A foldable mount with 180° adjustment makes it easy to set the right lighting angle regardless of conditions. The built-in cooling system with a quiet fan effectively protects the components from overheating without generating noise during recordings.

Wireless Control and Convenient Operation

The MS60B can be operated directly via the buttons and dials on the housing or remotely using the NEEWER APP. Infinity technology allows you to control hundreds of lights simultaneously and perform wireless OTA software updates, which significantly simplifies work on more complex photo shoots. The built-in 2.4G module allows for group control of compatible lights on channels 00 through 99 at a distance of up to 15 meters. Simply change the settings on one light to automatically synchronize the other devices assigned to the same channel.

Ready for studio and outdoor use

The light is designed to work with various power sources, making it ideal for both studio and on-location shoots. The included battery plate allows you to use one or two NP-F750 or NP-F970 batteries, and it is also possible to power the light from a 14.4V V-Mount battery using a D-Tap cable. The kit also includes an AC adapter for uninterrupted operation when plugged into an outlet. Please note that the batteries cannot be charged while the light is in use.

Wide compatibility with light modifiers

The NEEWER MS60B uses the manufacturer’s proprietary mount equipped with an umbrella attachment, and the included Bowens adapter significantly expands your lighting configuration options. This allows you to easily attach softboxes, beauty dishes, photography umbrellas, and other popular light modifiers. Such broad compatibility makes the light ideal for portrait photography, interviews, live streams, YouTube and TikTok videos, and professional film productions.

Included

- MS60B LED light
- Reflector
- Mount
- Power cable
- Power adapter
- Battery plate
- Battery cable
- Bowens mount adapter
- User manual

Manufacturer	Neewer
Model	MS60B
Weight	700 g
Battery type	NP-F750/F970
Power source	AC adapter, mains power
Input voltage	100–240 V
DC output	19.6 V/4 A
Dimming range	0–100%
Color temperature	2700–6500 K
Channels	00–99
CRI	97+
Power	65 W
