## Aprašymas

### NEEWER PG001 mini follow focus with A/B stops

The NEEWER PG001 is a compact mini follow focus system that allows for smooth and precise manual focus adjustment during video recording. Its lightweight design, weighing just 320 g, ensures it fits easily into a gear bag and is ideal for mobile productions. The included gear ring fits lenses with a diameter of up to 114 mm, ensuring broad compatibility with various cinema rigs.

### Precise control and flexible positioning

The device features a control knob with adjustable A/B stops, allowing you to set specific focus points and quickly switch between them during recording. When unlocked, full 360° adjustment is possible, providing total freedom of movement. The follow focus mounts onto a standard 15 mm rod and features an adjustable arm with a tilt range of up to 138°, making it easy to adapt its position to various camera bodies and lenses.

### Convenient operation and modular design

The control knob is covered with non-slip silicone to ensure a secure grip and comfortable use, while the carefully calibrated mechanical resistance guarantees smooth, stutter-free movement. The set includes a 15 mm rod and a mounting bracket for quick attachment to a camera cage or shoulder rig. The modular design facilitates rapid assembly, disassembly, and compact storage.

### Included
