Aprašymas

Maono DM40 Pro microphone (white)

Maono DM40 Pro is a wireless gaming microphone with AI technology that offers studio-quality sound, intuitive operation and various modes of use (Gaming, Vlogging, Voiceover). The used 16mm condenser capsule and 48 kHz / 24 bit sampling allow recording sound with high detail and a wide frequency range (20 Hz - 20 kHz). The device can operate for up to 75 hours on a single charge, and audio transmission without delay (0.02 s) ensures full synchronization of voice and video.

AI technology that changes voice

The Maono DM40 Pro microphone features AI Voice Changer, which offers up to 10 different voice changing modes - a solution aimed at streamers, gamers and vloggers who want to add elements of surprise, humor or anonymity to their broadcasts. Switching between voices is smooth and secure, and the technology does not store or process the user's voice data.

Robust sound quality

The electret condenser capsule used captures sound omnidirectionally, making the microphone well suited for both solo streaming and group conversations. A frequency response of 20 Hz - 20 kHz and a high signal-to-noise ratio (73 dB) translate into clear and dynamic sound. The microphone's design is based on a sturdy base, with the ability to enable microphone monitoring and RGB mode switching, which ensures both comfort of use and aesthetics of the stand.

Advanced noise reduction

The Maono DM40 Pro's noise cancellation system operates at 3 intensity levels and can be manually configured in Custom mode. The microphone effectively eliminates up to 99% of ambient sounds such as fans, air conditioning and mouse clicks. Using Maono Link software, you can fine-tune the noise gate to suit your needs. The reduction works in real time with no noticeable lag, resulting in a cleaner broadcast during live broadcasts.

RGB backlighting

The microphone's aesthetics are complemented by built-in RGB backlighting with more than 16 million possible color settings. There are 3 lighting modes and 13 predefined colors that can be personalized in the Maono Link app. Microphone and listening volume controls, quick sound source switching and a mute button are located on the device's front panel for intuitive operation without reaching for a computer.

Multi-platform compatibility

The device offers strong compatibility with the most popular platforms and hardware, including PCs and Macs, smartphones, PlayStation and streaming and communication apps (Discord, Twitch, OBS, TikTok, YouTube). A USB-C transmitter, USB-A adapter and USB-C cable are included, so the microphone works as soon as it's plugged in without the need to install drivers. Microphone and listening volume controls, quick switching of audio sources and a mute button are located on the front panel of the device, allowing intuitive operation without reaching for a computer.

Long runtime

With a 2,600 mAh battery, the Maono DM40 Pro microphone can run for up to 75 hours (with RGB off). If you use the backlight, you can enjoy uninterrupted operation for 40 hours. The USB-C port allows you to conveniently renew power while using the equipment as well, so you don't have to worry that your transmission will have to be interrupted.

Included:

- Microphone
- USB-C receiver
- Adapter from USB-A to USB-C
- USB-C cable for data transmission
- User manual

Manufacturer	Maono
Model	DM40 Pro
Type	Capacitive
Directional characteristic	Omnidirectional
Frequency response	20 Hz - 20 kHz
Sampling frequency	48 kHz / 24 bit
Sensitivity	-3 dBFS ±3 dB (at maximum gain)
Signal-to-noise ratio	73 dB
