Aprašymas

VITURE XR Beast Glasses

When technology reaches its absolute peak, something more than a simple electronic device is born - a unique experience and an encounter with the future is created. VITURE XR Beast (Extended Reality, augmented reality) is the quintessence of advanced technology, modern design and absolute freedom of immersion. This is VITRUE's most ambitious and groundbreaking XR model, created for those who expect uncompromising quality - both for work and entertainment. They offer an impressive virtual screen with a large diagonal, high resolution and brightness, providing cinematic image quality with assistance. A built-in camera, support for 6DoF (Six Degrees of Freedom, a 3D space tracking system that takes into account both position and orientation), glass dimming adjustment and no built-in battery provide convenience and broad compatibility. A sleek metal design and eye protection complete the package - a complete, detail-oriented XR solution that redefines the concept of immersion.

A screen that anticipates reality

The glasses offer a 173-inch virtual screen suspended in front of you at a perfect distance of 3 meters, providing perfect visibility, regardless of the activity. The 1200p image with a refresh rate of 120 Hz and brightness of up to 1,250 nits delivers an experience comparable to 4K quality. That's thanks to the latest Sony panels and VisionPair™ technology, which lets you adjust the projected image to your preferences. With no reflections, distortion or fuzzy edges, the screen literally "disappears" and you're immersed in the content like never before.

Sound rich in detail

An amazing visual experience is only part of what VITURE Beast offers. Co-created with HARMAN, the sound is 3DoF (Three Degrees of Freedom, three-degree surround sound, responding to the user's head movement in three axes of rotation) spatial audio that responds to your head movement and allows you to feel every scene, every note, every detail with a new level of realism. Wirelessly, without interference and with the precision you expect from high-end audio systems.

Premium ergonomics in a metal frame

Every millimeter of the design has been engineered with comfort and durability in mind. Made from a combination of aluminum and magnesium, the frame provides lightness, strength and a luxurious look. The availability of two sizes (standard and large) makes the glasses a perfect fit for users with different pupil spacing (IPD - Interpupillary Distance, or pupil distance, up to 70 mm or 74 mm).

Technology that works for you

VITURE Beast offer full support for 6DoF in the SpaceWalker app, which allows for precise tracking of movement in space and expands the boundaries of interaction. The front RGB camera (Red, Green, Blue - red, green, blue; the primary colors of light used for image generation in digital systems and cameras) enables basic spatial capture, and with dynamic dimming control, you can adjust the level of lens darkness (9+ degrees) to your environment - from a bright room to full immersion in the XR world.

Your screen, your style, your rules

The VisionPair™ system allows you to customize the size, position and angle of your screen to your liking. Choose from five color modes, control brightness and volume on a 9-point scale, adjust the viewing axis - all from an intuitive interface. VITURE Beast are glasses that listen to you, not the other way around.

The future in your hands

Use the SpaceWalker app, available for Windows, macOS, Android and iOS, to change the way you consume content. Watch movies on multiple screens simultaneously, enable ultra-panoramic mode, and, thanks to artificial intelligence, activate 2D (Two-Dimensional, two-dimensional image) to 3D (Three-Dimensional, three-dimensional image) conversion in real time - the world's first XR glasses to offer this capability. The technology, which until now was only a promise, is now becoming a reality.

No cables. No compromises. No limitations.

VITURE XR Beast does not have a built-in battery - it works directly when connected to a device via USB-C (Universal Serial Bus, a connector standard for transferring data and power between electronic devices) for uninterrupted operation and a lightweight design. It supports almost any compatible mobile device, computer or console, eliminating the need for additional power sources and setup.

A+ vision protection

Ensure comfort and safety - SGS A+ Eye Care technology (a certification awarded by the international body SGS - Société Générale de Surveillance - confirming the highest level of eye safety for prolonged use of displays) reduces eye fatigue even during hours of use, while axis adjustment and IPD adjustment allow you to fully customize the device. VITURE Beast is the definition of modern technology, sophisticated design and unlimited possibilities. Ready to discover a new dimension?

Included

- XR glasses
- lens frame
- interchangeable 3x nose pads (size 1, 2, 3)
- USB-C to USB-C cable (1.2 m)
- glasses case
- cover
- cloth for cleaning glasses

Manufacturer	VITURE
Model	Beast
Dioptric adjustment	None
Audio system	HARMAN AudioEFX
Speakers	Built-in surround sound
Basic frequency	250 Hz ± 50
Sound settings	9 levels
Electrochromic films/dynamic tone control	9 levels
Optical transmittance	0.5-40%
Fogging	<1%
Discoloration time	0.1 seconds
Water detection	Yes
Suggested usage time	3-4 hours
Connection	USB-C
Resolution	3840(H)x1200(V) & 1920(H)x1200(V) per eye
FOV (field of view)	58°
Contrast ratio	≥100,000: 1
Colors	108% sRGB
IPD	Standard size: 64.0±6.0mm; Large size: 68.0±6.0mm
Visual fusion	Yes
2D/3D display	Yes
Highest visible brightness	1250 nits
Brightness control	9 levels
Dedicated applications	SpaceWalker, Immersive 3D
Compatibility	Windows, Mac, Android, iOS
Dimensions	155 × 50.1 × 56.5 mm (folded), 191 × 85 × 85 mm (unfolded)
Weight	88 g glasses, 300 g glasses case

Net weight: 88, GPSR Link: https://psr-assets.innpro.pl/gaming/sg_gaming_ar_glasses.pdf, Gross weight: 650, Box length: 20,50, Box width: 9,00, Box height: 11,50, Last delivery: 27.10.2026
