LEPRO TB2 RGB Desk Lamp

The Lepro TB2 is a designer desk lamp that combines striking RGBIC lighting with AI features to create the perfect atmosphere for work, relaxation, gaming, or an evening movie. Thanks to voice control, a mobile app, and music synchronization, changing the ambiance takes just a moment. Smart personalization features allow the lighting to adapt to your preferences and interior style, while the minimalist aluminum design gives the whole a modern character. It's more than just a lamp—it's the center of smart ambiance in your room.

AI that designs lighting

The Lepro TB2 RGB uses LightGPM 4 technology, an AI-powered smart lighting designer that helps create lighting effects without the need to manually adjust settings. Simply tell the app what mood you want to achieve or what you need the light for, and the system will suggest the best-suited settings based on professional knowledge of colors and atmosphere. The more you use the lamp, the better the algorithm learns your taste and preferences, making subsequent suggestions even more

accurate and personalized.

Convenient voice control

Forget about clicking through dozens of modes and scenes. Advanced voice control lets you naturally describe the effect you want to achieve. Want to create a party vibe, give your room a futuristic look inspired by your favorite game, or set a cozy mood for an evening movie? Just one command in the Lepro app is all it takes. The lamp will instantly generate the right lighting composition, without the need for a remote control or manual configuration.

Creating lighting using photos

It's not always easy to describe the perfect mood with words, which is why the Lepro TB2 RGB can analyze images. The photo recognition feature allows you to create lighting tailored to a specific interior or visual inspiration. You can take a photo of your room to get harmoniously matched colors, or upload a movie poster, game artwork, or your favorite illustration, and the system will prepare a lighting effect that references the selected theme. It's a simple way to create a unique space without knowing the principles of lighting design.

Dynamic RGBIC and music synchronization

Built-in RGBIC technology allows for the display of multiple colors simultaneously, making the lamp look more extraordinary than classic RGB lighting. Colors transition smoothly into one another, creating dynamic compositions perfect for a gaming setup, a modern living room, or a creative office. LightBeats mode additionally synchronizes lighting effects with the beat of the music, transforming the room into an energetic party space or an immersive entertainment hub.

Create your own scenes and get inspired by the community

The Lepro TB2 RGB offers immense freedom for customization. You can design each scene yourself, adjusting colors, brightness, animation speed, and individual lighting segments. This makes it easy to create your own lighting profiles tailored to work, gaming, relaxation, or streaming. Additional inspiration comes from the Lepro community, where users share their own projects and ideas for creative uses of smart lighting.

Original design and solid construction

The lamp’s modern styling blends perfectly with contemporary interiors, and the use of aluminum and durable PVC gives the design an elegant and original look compared to traditional models. The sturdy housing and futuristic look highlight the device’s character and make the lamp look great on a gaming desk, in a minimalist living room, or in a modern office.

Smart control from anywhere

The lamp supports 2.4 GHz Wi-Fi and Bluetooth connectivity, allowing you to conveniently manage the lighting via a mobile app from anywhere. You can change colors, adjust brightness, create schedules, and set timers, tailoring the light to your daily routine. The group control feature allows you to synchronize multiple devices simultaneously, enabling you to create a cohesive smart lighting system throughout your home. What’s more, the TB2 integrates seamlessly with your smart home ecosystem—support for Amazon Alexa and Google Assistant lets you control the lamp with simple voice commands, without reaching for your phone. Changing colors, activating effects, or adjusting brightness becomes quick and convenient, whether you’re working, relaxing, or gaming.

Included

- lamp
- power adapter
- user manual

Manufacturer	Lepro
Model	TB2
Switch type	Built-in
Light source type	LED
Water resistance	No
Lighting method	Dimmable

Communication protocol	Wi-Fi
Voice assistant	Amazon Alexa, Google Assistant
