382.99€

The GIGABYTE AORUS X870 STEALTH ICE motherboard is designed for high-performance gaming and computing, featuring support for AMD Ryzen processors to deliver processing power. This motherboard includes DDR5 SDRAM compatibility with speeds up to 8000 MT/s, ensuring swift data processing and seamless multitasking. Multiple M.2 slots enhance storage expansion options, while robust cooling solutions keep temperatures in check during intense sessions.

With a rich selection of ports, including USB 3.2 Gen 2 and USB4 options, connectivity is effortless, enabling fast data transfer and peripheral integration. The high definition audio capabilities with 8-channel support enhance the multimedia experience, providing sound quality tailored for gamers and audio professionals. Built with quality materials, the AORUS X870 STEALTH ICE is equipped with advanced power design and reliable componentry, ensuring a stable platform for all computing needs.
