Aprašymas

ZEUSLAP ZP156 15.6" Portable Monitor

The ZEUSLAP ZP156 15.6" portable monitor is a compact Full HD 1920×1080 display with a 16:9 aspect ratio, featuring a-Si TFT-LCD (IPS-level) technology that provides wide viewing angles of 89°/89°. It offers 100% sRGB coverage, 300 nits of brightness, and a 1000:1 contrast ratio, resulting in a natural and clear image for everyday use. This model is equipped with USB-C (with power delivery) and mini HDMI ports, as well as a 3.5 mm audio output. The monitor measures approximately 355 × 210 mm and weighs about 650 g, making it easy to take with you and use as an additional screen for work or entertainment.

Realistic colors and a clear image

The IPS-level panel ensures the image remains consistent even when viewed from an angle, which is important when working with others or while traveling. 100% sRGB coverage translates to more natural color reproduction, so photos, videos, and graphics simply look right. The 300-nit brightness works well in indoor settings and under standard office lighting.

Specs tailored for everyday use

The 60 Hz refresh rate ensures smooth visuals during office work, movie watching, and basic entertainment. The claimed 4 ms response time (Tr+Td) refers to the rise and fall time of the signal, which in practice means a standard speed for this type of panel. Thanks to this, the monitor handles everyday tasks well, though it is not a typical gaming model. The 1000:1 contrast ratio maintains an adequate difference between light and dark elements of the image.

Design and Actual Dimensions

The monitor’s housing is designed to be as slim as possible and easy to transport. The thinnest part of the panel is approximately 6.4 mm, while the lower section containing the electronics is thicker, bringing the total depth to about 14 mm. This design maintains a sleek appearance while accommodating all necessary components. The built-in stand makes it easy to quickly set up the monitor on a desk without additional accessories.

Ports and connectivity

The presence of two USB-C ports and a mini HDMI port provides great flexibility when connecting various devices. You can use the monitor with both a laptop and a smartphone, expanding your workspace or displaying multimedia on a larger screen. With USB-C compatible devices, it is possible to simultaneously transmit video and power over a single cable, simplifying setup. Additionally, the 3.5 mm jack allows you to connect headphones, and physical buttons enable quick control of display settings.

Workplace functionality and VESA mounting

The monitor can serve as a second screen, making it easier to work with multiple applications simultaneously and improving workspace organization. Built-in speakers allow for quick use without additional audio equipment, though headphones can be used if needed. The presence of VESA holes allows the monitor to be mounted on a stand or arm, which improves work ergonomics. As a result, this model is suitable not only for mobile use but also as a permanent fixture on an office desk.

Included

- ZEUSLAP ZP156 Monitor
- USB-C to USB-C cable
- Mini HDMI cable
- USB to USB-C cable (power)
- User manual

Manufacturer	ZEUSLAP
Model	ZP156
