ZEUSLAP Z14W Portable Monitor with Dual 14" Touchscreens

The ZEUSLAP Z14W portable monitor with dual 14" screens is a mobile solution designed for work and entertainment, equipped with two IPS panels featuring a resolution of 1920×1200 (WUXGA), a 60 Hz refresh rate, and 100% sRGB coverage. The main screen supports multi-touch, which facilitates daily work, and the foldable design with automatic 180° screen rotation enhances user comfort. The monitor offers 400 nits of brightness, a 1200:1 contrast ratio, and high color accuracy (Delta E 2), making it suitable even for more demanding tasks. USB-C (Thunderbolt) and mini HDMI ports are available, allowing for the independent connection of two video sources, and PD power with pass-through functionality lets you work and charge devices simultaneously.

Dual screen - greater work comfort

Two 14-inch displays significantly increase your workspace, allowing you to better organize your tasks and avoid constantly switching between windows. You can work on documents on one screen while previewing data or a messenger app on the other. Importantly, thanks to independent inputs, you can connect two different devices—such as a laptop and a game console—and display their images simultaneously. This flexibility makes the monitor ideal for both work and entertainment.

Image Quality and Color Accuracy

IPS panels provide wide viewing angles and consistent color reproduction, which is essential for teamwork or presentations. 100% sRGB coverage and a Delta E 2 rating ensure high color accuracy, making the monitor suitable for graphic design or photo editing. A brightness of 400 nits improves visibility in brighter rooms, and a 1200:1 contrast ratio enhances detail clarity. In practice, this translates to a more comfortable and predictable viewing experience.

Touch Where It Matters

The touch function is available on the main screen, allowing for intuitive operation without having to rely solely on a mouse. You can quickly scroll through documents, zoom in on content, or edit projects directly on the screen. The second display serves as an additional workspace, which, combined with touch, boosts efficiency. This solution works well for mobile work and during presentations.

Foldable design and automatic rotation

The one-piece, foldable housing allows you to adjust the tilt angle, making it easy to adapt the setup to your workspace. The automatic 180° image rotation feature adjusts the display to the monitor's current position, eliminating the need for manual adjustments. You can use landscape, portrait, or split-screen mode, depending on your needs. This solution enhances convenience and allows you to quickly adapt the monitor to a specific task.

Connectors and Independent Screen Support

The monitor is equipped with USB-C (Thunderbolt) and mini HDMI ports, which are assigned separately to the main and secondary screens. This allows you to connect two different video sources and use them simultaneously without having to switch cables. Support for mirror, split, and portrait modes lets you adjust the display to suit the situation. The slim design (approx. 15.8 mm) and weight of about 1.35 kg make it easy to take the monitor with you on the go. The built-in stand and VESA 75 × 75 mm mount allow for wall mounting or convenient placement on a desk.

Included

- ZEUSLAP Z14W Monitor
- Charger
- USB-C to USB-C cable x 2
- Mini HDMI cable
- User manual
