Processor Intel Core i3-12100F 3.30 GHz (Alder Lake-S) LGA 1700 - Optimized for Budget Gaming and Productivity

The Intel Core i3-12100F represents a significant leap forward in entry-level processing power. Utilizing the highly efficient 12th Generation Alder Lake-S architecture, this processor delivers outstanding single-core performance, making it an excellent choice for dedicated gaming rigs and responsive everyday desktop use.

Engineered for the LGA 1700 socket, the i3-12100F provides a robust foundation for modern PC builds. With a base clock speed of 3.30 GHz, it handles demanding applications and fast-paced gaming environments with ease. As this is an "F" series CPU, it requires a dedicated graphics card (GPU) for visual output, allowing builders to allocate budget towards a high-performance GPU.

Next-Generation Features:

- **Alder Lake-S Architecture:** Built on Intel's innovative 12th generation platform, ensuring high efficiency and low latency performance.
- **High Base Frequency:** Operates at a powerful 3.30 GHz base clock speed for quick responsiveness in applications and games.
- **LGA 1700 Socket Compatibility:** Ready for the latest generation of Intel motherboards, offering future upgrade pathways.
- **Boxed Solution:** Includes a standard Intel cooler, providing essential thermal management right out of the box for immediate installation.
- **Ideal for Builders:** The lack of integrated graphics allows system builders to maximize performance per dollar by pairing the CPU with a powerful dedicated graphics card.

INTEL is globally recognized as the leader in semiconductor technology, consistently delivering innovative processor solutions that power the world's servers, desktops, and laptops, ensuring reliability and cutting-edge performance.
