Essentially, it's a short cable (260mm or about 0.26m) designed to **connect a device with an MMCX connector (like a wireless miniPCI-express card) to an antenna with an RPSMA connector.**

It's commonly used with MikroTik's BaseBox2 or BaseBox5 devices to **add a second wireless interface**, allowing for more flexible antenna configurations or dual-band operation.

MMCX to RPSMA pigtail, for adding second wireless interface to BaseBox2 or BaseBox5
