Aprašymas

Small, Lightweight, Versatile
The DJI Mic 3 Transmitter is compact, lightweight, and discreet. It supports both magnetic and clip-on attachment methods. The detachable, rotatable clip allows you to flexibly adjust the microphone angle, whether clipped sideways or inverted, ensuring optimal audio capture in any scenario.

All-In-One, Ready To Go
The charging case neatly holds two transmitters and one receiver. Each transmitter fits inside with the windscreen and either the magnet or magnetic clip attached—no need to remove them. When the transmitters are stored with the clips attached, the lid also has space for the magnets and locking audio adapter cable, so everything stays organized and ready to go.

Premium Audio, Smarter Experience

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. Gamintojas ir pardavėjas neatsako už galimus duomenų neatitikimus ar tipografines klaidas. Prieš įsigyjant rekomenduojame pasitikrinti aktualią informaciją.

Adaptive Gain Control for Balanced Volume Automatic
Automatic mode effectively prevents audio clipping, making it ideal for outdoor environments with dramatic volume fluctuations, such as sporting events.

Dynamic
Dynamic mode automatically adjusts gain in response to volume changes, ensuring consistent loudness—ideal for quiet indoor settings like studios.

Three Voice Tone Presets To Match Your Style Regular
Regular is the default setting, offering clean, natural, and balanced audio.

Rich
Rich puts extra emphasis on the lows for a fuller, more powerful sound.

Bright
Bright highlights the highs, giving your voice extra clarity and sparkle.

Two-Level Noise Cancelling for Focused Sound Basic
The Basic level is ideal for quiet indoor settings, reducing fan, air conditioning, and reverb noises while preserving vocal clarity.

Strong
The Strong level excels in noisy environments, significantly cutting ambient noise for clearer vocals.

With the windscreen attached, the transmitter effectively reduces wind noise and other unwanted noise, delivering crisp, clear audio even in windy conditions or noisy environments—ideal for live streaming, vlogging, and more.

Effortless Control, Smooth Operation
On-Receiver Parameter Adjustment
The receiver features a 1.1-inch AMOLED touchscreen and a dial, putting gain, battery status, and modes at your fingertips. Adjust settings quickly and enjoy flexible, efficient operation.

App-Based Control & Firmware Updates
Use the DJI Mimo app to fine-tune settings and update firmware directly from your phone. Enjoy quick, convenient parameter adjustments and effortless upgrades.

Robust Performance, Endless Possibilities

4 TX + 8 RX for Seamless Collaboration

DJI Mic 3's receiver can connect with up to four transmitters at once, letting you capture four audio sources simultaneously. The main receiver can also sync audio to up to seven additional receivers. Whether it's a group interview or a multi-camera production, you'll get crystal-clear audio on every device, making post-production a breeze.

Flexible, Versatile Channel Settings
The receiver lets you choose between Mono and Stereo (dual-channel) modes—output audio from each transmitter separately, or merge them into a single track to suit any creative scenario.

Four-Channel Output, Effortless Editing
When set to Quadraphonic mode, the DJI Mic 3 Receiver—paired with select Sony cameras or computer software—supports independent output of four audio tracks. This enables precise track separation and flexible mixing, giving you greater creative freedom in post-production.

Dual-Band Reliability, Rock-Solid Transmission

DJI Mic 3 supports automatic frequency hopping between 2.4 GHz and 5 GHz bands, with a transmission range of up to 400 meters. Its robust anti-interference capabilities ensure stable audio transmission, even in complex wireless environments like trade shows.

Lossless Transmission, Pristine Audio
With Lossless Audio enabled, the transmitter delivers uncompressed 48kHz 24-bit audio directly to the receiver. This ensures every recording is captured in stunning, high-fidelity detail.

Dual-File 32-bit Float Internal Recording
Internal Recording
Never worry about lost audio—internal recording protects your material from wireless interference or device failures. With dual-file internal recording, DJI Mic 3 saves both the original track and an algorithm-enhanced version at once, streamlining your workflow and keeping your creative process smooth.

32-bit Float Internal Recording
With support for 32-bit float internal recording, DJI Mic 3 provides a high dynamic range that not only delivers high-quality recording but also adapts better to complex sound environments. It excels in capturing every nuance of a voice, from quiet whispers to booming decibel levels, providing greater reliability in erratic noise scenarios and more flexibility in post-production.

Built-in Timecode for Precise Sync
DJI Mic 3 offers high-precision timecode support, with the transmitter embedding timecode data during internal recording and the receiver supporting both timecode input and output. With less than one frame of drift over 24 hours, you can instantly align multi-camera footage in post-production, making editing faster and more efficient.

Hassle-Free File Export
When you're done shooting, simply use the charging case and USB-C data cable to connect both transmitters to your computer or smartphone . Instantly transfer all your internally recorded files in one go—editing and sharing couldn't be easier.

Chapter 4: All-Day Power, Worry-Free Creation
28-Hour Extended Battery Life
A transmitter lasts up to 8 hours, and a receiver up to 10 hours. A fully charged charging case provides about 2.4 full charges to achieve a total of 28 hours of extended use. Easily handle long video shoots and live streams without worrying about running out of power.

5-Minute Quick Charge
Charge for just 5 minutes and get up to 2 hours of use from the transmitter and receiver—ideal for a quick power boost. With 3C fast charging support, a full charge takes only about 50 minutes, so you can get back to creating in no time.

Summary: DJI Mic 3 (2TX+1 RX+Charging Case). Microphone direction type: Omnidirectional, Equivalent noise level: 22 dB. Receiver type: Camera mount receiver, Receiver power source: Battery. Transmitter type: Bodypack transmitter. Product colour: Black, Bluetooth frequency band: 2.4 - 2.4835 GHz, Signal-to-Noise Ratio (SNR): 72 dB. Battery life (max): 8 h, Battery technology: Lithium-Ion (Li-Ion), Battery type: Built-in battery | Vendor Homepage: https://store.dji.bg/en/dji-mic-3-1-tx-1-rx.html | Mikrofono krypties tipas: Įvairiakryptė | Lygiavertis triukšmo lygis: 22 | Imtuvo tipas: Ant kameros montuojamas imtuvas | Imtuvo maitinimo šaltinis: Baterija | Siųstuvo tipas: Siųstuvas dėžutėje | Produkto spalva: Juoda | Bluetooth: Taip | „Bluetooth“ dažnių juosta: 2.4 - 2.4835 | Signalo ir triukšmo santykis (SNR): 72 | Maksimalus veikimo nuotolis: 400 | Audio išeiga: 3.5 mm | Baterijos naudojimo laikas: 8 | Baterijos technologija: Ličio-jonų (Li-Ion) | Baterijos tipas: Integruota baterija | Baterijos įtampa: 3.87 | Imtuvo matmenys (W x D x H): 28.69 x 53.85 x 22 | Imtuvo svoris: 25.1 | Siųstuvo matmenys (P x G x A): 28.34 x 28.77 x 16.35 | Siųstuvo svoris: 16 | Nešiojimo krepšys: Taip | Pridedamų imtuvų skaičius: 1 | Pridedamų siųstuvų skaičius: 2 | Bruto svoris: 0.37 | Neto svoris: 0.016 | Vienetų skaičius vienoje siuntimo dėžėje: 16 | Vieneto plotis: 5.6 | Vienetų skaičius ant paletės: 0 | Shipping Box Height: 22.5 | Vieneto gylis: 12.3 | Vieneto aukštis: 16.5 | Name: CAMERA ACC MIC 3 2TX+1RX+CASE/CP.RN.00000480 DJI | Model: DJI Mic 3 | Model name: Mic 3 (2TX+1 RX+Charging Case)
