

Magcubic HY300X-3 Projector

Modelis: HY300X-3

Gamintojas: MAGCUBIC

EAN: 757047110734

Prekės kodas: 569715

73.99€

Magcubic HY300X-3 Projector

The Magcubic HY300X-3 projector weighs just 438 g, yet offers a native resolution of 1280 × 720p and full support for 4K content decoding. So you can use it anywhere and enjoy high-quality content without being limited to a specific source. The Android 11 operating system, a powerful Allwinner H713 processor, and Wi-Fi 6 connectivity allow you to run apps smoothly directly on the device, so you don't need a laptop or an additional media player. The Electric Focus feature eliminates the need for manual focusing—you can adjust the image using the remote control. Rounding out the package is a unique 90° rotation design that lets you direct the projection onto a wall, ceiling, or any other surface, creating a complete entertainment system.

Image Focus and Geometry Under Control

Electric Focus technology eliminates the need for manual lens adjustment—you can now adjust the image focus conveniently and precisely using the buttons on the remote control. Native 720p—

resolution supported by 4K decoding and a powerful Mali-G31 graphics processor ensure a stable and smooth image, which is crucial for dynamic movie scenes or games. The intelligent image adjustment system includes automatic vertical correction and advanced 4-point manual correction, which allows you to adjust each of the four corners independently.

Cinema-scale image and short-throw technology

The 0.8:1 throw ratio allows you to achieve an impressively large image even at a short distance from the wall. Even from a distance of just 1.6 m—which is recommended as optimal for maximum clarity—you get a 75-inch screen. By increasing the distance to 2 m, you'll get a 100-inch image, and at just 2.6 m, you can enjoy a gigantic 130-inch projection. This range of settings allows the projector to adapt to your space, eliminating the need to move furniture or rearrange your interior. Additional flexibility is provided by the digital zoom with a range of 100–80%, allowing you to precisely reduce the image size without physically moving the device. The design is complemented by a stable, integrated stand that allows for 180° rotation, opening up new possibilities—from a classic wall projection to total relaxation with a movie projected directly onto the ceiling.

Independent Android 11 Multimedia Ecosystem

The built-in Android 11 operating system provides direct access to the most popular streaming platforms, such as Netflix, YouTube, Prime Video, Disney+, Hulu, and Max, completely eliminating the need for external TV set-top boxes or laptops. The powerful Allwinner H713 processor ensures smooth performance, stable operation, and seamless multitasking. You can simply turn on the projector and immediately select the content you want—without unnecessary cables or time-consuming setup of external sources.

Wi-Fi 6 and Wireless Image Synchronization

The use of a dual-band Wi-Fi 6 module (2.4 GHz and 5 GHz) ensures a stable connection, which translates to smooth playback of high-quality content without annoying buffering. This modern technology offers data transfer speeds up to 300% faster and a 37% reduction in latency compared to the Wi-Fi 5 standard, ensuring a comfortable experience for streaming and online gaming. The projector supports Seamless Screen Mirroring technology, allowing you to instantly display content from your smartphone or tablet on the big screen using AirPlay, Miracast, or the Android Wireless

feature. For maximum reliability, wired connectivity is also available, and Bluetooth 5.0 ensures stable pairing of the projector with speakers, headphones, or control accessories.

Hi-Fi Audio System and Multiple Connectivity Options

The built-in 5 W speaker delivers clear and crisp sound with Hi-Fi Audio technology, allowing you to enjoy your content comfortably without the need for an external sound system. The device focuses on modern, wireless solutions—since it lacks a traditional AUX jack, you can reliably connect an external home theater system, soundbar, or headphones via Bluetooth 5.0. A full-size HDMI port allows for instant connection to a gaming console, computer, or TV Stick, while the USB port enables direct playback of files from external storage devices. Thanks to such broad compatibility, the projector serves as a versatile entertainment tool—from movie nights and gaming on the big screen to professional multimedia presentations.

Portable design and instant readiness

The projector requires no permanent installation or specialized setup—its “plug-and-play” configuration allows you to start projecting within seconds of turning it on. Its minimalist design and integrated stand eliminate the need for additional mounting accessories, making it an ideal solution not only for home use but also for vacations, camping trips, or presentations outside the office.

Manufacturer	Magcubic
Model	HY300X-3
Max. native resolution	720P/4K
Max. brightness	300 ANSI lumens
Signal support	Up to 4K
Operating system	Android 11
Processor	Allwinner H713
Keystone correction	Automatic vertical, manual 4-point (4P)
Focus adjustment	Electronic (Electric Focus controlled via remote)
