Pagrindinės savybės

- ✓ Game console microphone -40 dB 50 - 16000 Hz Unidirectional/Cardioid
- ✓ Wired Device interface: USB 2 m
- ✓ White
- ✓ Power source: USB
- ✓ Desktop stand Cables included: USB

Aprašymas

Do you have a small budget, but you know perfectly well that your voice deserves more than mediocrity? We think so too! The GENESIS Radium 250 is a condenser microphone that combines solid construction, good sound quality and readiness to perform right out of the box. Set on a classic tripod, it will be perfect for any gamer's desk. If you want to enter the world of streaming, podcasting, or simply sound clear while playing online - this is your new weapon.

Your voice without compromise

The Radium 250 offers surprisingly good recorded voice quality considering its price shelf. The microphone is designed to collect sound cleanly, with perceptible depth, eliminating unwanted background noise. It's ideal for voice conversations, content creation or recording podcasts where clarity of speech is important. Thanks to its cardioid directional characteristic, the microphone focuses on your voice, ignoring what's going on in the background.

Full control and zero delays

Don't waste your time guessing whether you can be heard correctly. The Radium 250 offers real-time, zero-latency listening which allows you to monitor sound quality in real time and catch potential errors. This is especially important during live broadcasts or recordings, where maximum precision counts. In addition, the microphone is equipped with aGain knob, which allows you to quickly adjust the sensitivity without having to go into system settings or external applications. And you? You're in full control - exactly as it should be.

RGB that plays along with you

At GENESIS, we know that hardware should not only work, but also look. That's why we've equipped the Radium 250 microphone with subtle but stylish RGB backlighting that accentuates your gaming rig and gives it a unique character. Whether you're creating at night or streaming in full daylight, your microphone will always look like a true gamer's tool.

Everything you need in the kit

The GENESIS Radium 250 is not just a microphone - it's a complete set ready for action. Unlike the Radium 251, you'll find a sturdy stand in the box that provides a secure position on your desk, regardless of its surface. This is a great solution if your desk doesn't allow you to mount a microphone arm. You also get a pop filter included, which reduces unpleasant "blast voices," improving the clarity of your recordings. The cable ties, on the other hand, help keep things neat and prevent tangled wires. Details? Yes, because it's the details that really make a difference.

Techninė specifikacija

Microphone	
Type	Game console microphone
Microphone sensitivity	-40 dB
Microphone frequency	50 - 16000 Hz
Bit rate	24 bit
Sample rate	192 kHz
Microphone direction type	Unidirectional/Cardioid
