

GIGABYTE B860M E GEN5 LGA1851 1xHDMI 1xDP

Modelis: B860M E GEN5

Gamintojas: GIGABYTE

Prekės kodas: 571029

124.99€

The GIGABYTE B860M E GEN5 motherboard is engineered to support Intel Core Ultra processors, delivering a solid foundation for both gaming and professional use. With support for DDR5 SDRAM and a range of RAM speeds up to 8800 MT/s (overclocked), this motherboard ensures reliable performance for high-demand applications. The micro ATX form factor provides flexibility in building compact systems without compromising on features, including advanced audio capabilities and multiple expansion slots for upgrades.

Designed for versatility, the B860M E GEN5 includes a variety of interfaces such as HDMI, DisplayPort, and USB 3.2 Gen 1, making it easy to connect multiple devices and peripherals. The motherboard also features RAID configurations for enhanced storage performance and security. Additionally, with customizable RGB FUSION lighting and a durable design, users can expect both style and reliability from this GIGABYTE solution.
