TIMEKETTLE T1 Translator (gray)

Communicating freely in a foreign language can be easy and natural, whether you're in the center of a big city or far from network coverage. The Timekettle T1 Translator combines smart online and offline translation, instant responses, and high accuracy for smooth, stress-free conversations. Support for multiple languages and accents opens the door to connections around the world, and conversation, listening, chat translation, and photo modes allow you to tailor the device to any situation. A convenient screen, quick one-button operation, and useful travel features make it intuitive and comfortable to use.

Translation without borders

Timekettle T1 is the first in the world to use AI Edge-Model technology, an advanced artificial intelligence model that runs directly on the device. This allows the T1 to provide smooth real-time translation even in places where the network is weak or unavailable, breaking the limitations of

traditional translators. The device supports 43 languages and 96 accents, covering a huge number of countries and regions around the world. No matter where you travel, you can count on smooth, comfortable, and stress-free communication.

Smart online and offline switching

Thanks to intelligent network detection technology, Timekettle T1 automatically switches between online and offline modes. In the mountains, by the sea, in the jungle, or in remote regions of the world, translation works continuously without your intervention. The device itself ensures stable operation, providing continuous communication even with an unstable connection.

Accuracy that makes a difference

The translator offers translation accuracy of up to 95%, both online and offline. The use of a multi-microphone array and EDC noise reduction algorithm allows it to effectively capture the speaker's voice even in noisy environments. All this is supported by the Timekettle UniSmart AITP system, which analyzes the context of the speech and ensures that the translations sound natural.

Simple and convenient operation

Just double-press the power button to instantly start a smooth conversation. One-Click Translation mode makes Timekettle T1 great for breaking the ice during business meetings, trips, or casual outings with friends. With one click, you can switch the screen to landscape mode for a clear, two-column view of the source text and translation. Landscape Mode greatly facilitates face-to-face communication and quick content comparison.

Smart modes that facilitate communication

Listen Mode allows you to instantly translate statements addressed to you or sounds heard in your surroundings. It's ideal for lectures, briefings, sightseeing, or spontaneous conversations when you have no control over the speaker's pace. The Chat Translation feature automatically captures the dialogue between speakers and translates it into the selected language without the need to manually activate subsequent commands. This allows the conversation to flow freely and naturally, allowing you to fully focus on the content.

Translate text from photos in seconds

Timekettle T1 is equipped with an 8-megapixel camera and an advanced OCR engine that also works offline. Just take a photo to instantly translate text in one of 39 supported languages. Menus, road signs, documents, and flyers are no longer a barrier, regardless of where you are or what situation you find yourself in.

Complete freedom with offline translations

The device supports 44 language pairs in offline mode, enabling accurate translations even without any network access. It is a reliable solution for travelers, professionals, and field workers who often encounter connectivity issues.

Instant translation and low latency

With Streaming ASR technology and a global infrastructure of over 150 servers and accelerators, Timekettle T1 responds instantly. Translations appear in as little as 0.2 seconds, giving the impression of reading live subtitles and ensuring a natural flow of conversation.

Thoughtful design

The compact design with a 4-inch 540 × 1080 screen, low weight of 115 g, and practical features such as a world clock, real-time currency exchange rates, and voice memos make Timekettle T1 an indispensable companion for any trip. This device not only translates, but also significantly improves the comfort of traveling around the world. In addition, you can enjoy 24 months of free data transmission without worrying about additional costs.
