Philips N-100 480p Mini Projector (White)

The Philips N-100 is a compact multimedia projector that lets you turn any room into a home entertainment zone. It uses LCD technology and a modern LED light source with a lifespan exceeding 30,000 hours, ensuring many years of trouble-free use. The device also offers a native resolution of 800 x 480 pixels and supports signals up to Full HD 1920 x 1080, displaying an image with a diagonal of 20 to 65 inches at a projection distance of 80 to 200 cm. A 3000:1 contrast ratio, 16:9 widescreen aspect ratio, and built-in 2 x 3 W stereo speakers let you enjoy a cinematic experience while watching movies, TV shows, photos, and playing games.

A screen that creates a unique atmosphere

It takes just a moment for an ordinary wall to turn into a home entertainment center. The Philips N-100 has compact dimensions of 205 x 158 x 78 mm and weighs just 880 g, so it easily fits on a table, shelf, or desk. Placed at a distance of 80 to 200 cm, it projects an image ranging from 20 to 65 inches, giving movies, TV shows, photos, and games a truly cinematic feel.

An image tailored to your space

The projector offers manual focus adjustment and manual keystone correction, making it easy to set up a clear and properly proportioned image even when the device isn't positioned perfectly in front of the wall or screen. A throw ratio of 1.49:1 allows you to project a large image from a relatively short distance, making it easier to use the projector in smaller rooms. There are also 4 projection modes available, including ceiling mounting.

Natural colors and an energy-efficient LED light source

The projector uses LCD technology and an efficient LED light source that delivers rich colors and stable image quality for over 30,000 hours of operation. This means up to a dozen years of daily use without needing to replace the light source. An additional advantage is its low power consumption—just 42 W during operation and 0.5 W in standby mode, allowing for economical use.

Built-in media player

The device can independently play movies, music, and photos stored on USB drives, microSD cards, and external storage media. It supports popular video formats such as MP4, AVI, MKV, and RMVB, as well as MP3, FLAC, WAV, and AAC audio files, and BMP, PNG, and JPEG photos. This allows you to enjoy your favorite content without having to connect an additional computer.

Dynamic stereo sound

The built-in 2 x 3 W speakers deliver clear sound for everyday use. The projector also offers various sound modes, such as Movie, Music, and Sports, allowing you to adjust the sound profile to the content you're watching. If you want even better audio, you can connect headphones or external speakers via the 3.5 mm audio output.

Extensive connectivity options

The projector is equipped with two HDMI ports, a VGA port, an AV input, a USB-A port, a microSD card slot, and a 3.5 mm audio output. This set of interfaces allows you to conveniently connect a laptop, game console, set-top box, media player, or Smart TV dongle. The USB-A port can also power devices requiring 5 V / 1 A, such as streaming dongles, eliminating the need for a separate power adapter.

Included:

- Mini projector
- Remote control
- 2 AAA batteries for the remote control
- 3 power plug adapters
- AC power adapter
- Quick start guide
