Philips N-150 1080p Projector (Dark Gray)

The Philips N-150 is an advanced multimedia projector that combines native Full HD resolution of 1920 x 1080 pixels with 250 ANSI lumens of brightness, delivering a clear and detailed image on a screen ranging from 40 to 80 inches. A modern LED light source with a lifespan exceeding 30,000 hours ensures rich colors and long-lasting, maintenance-free operation for many years. The projector is equipped with a 180° swivel stand, automatic keystone correction, wireless screen mirroring via dual-band Wi-Fi, and Bluetooth for connecting to external speakers. Built-in 2 x 3 W stereo speakers, a compact 126 x 208 x 144 mm chassis, and extensive connectivity options make the N-150 perfect for both evening movie nights and everyday multimedia use.

Full HD 1080p, which shows more detail

The native resolution of 1920 x 1080 pixels allows you to fully exploit the potential of high-quality movies, TV shows, and streams. The image is sharp, clear, and rich in detail, which you'll appreciate

during movie nights as well as when displaying presentations or educational materials. A brightness of 250 ANSI lumens and a 1000:1 contrast ratio help deliver naturally reproduced colors and clear visibility of details.

40 to 80 inches of private cinema

The projector displays an image ranging from 40 to 80 inches, offering a much larger screen than a TV or monitor. The recommended viewing distance of approximately 213 cm produces an 80-inch image, which is perfect for watching movies, sports events, and playing video games. The 16:9 aspect ratio ensures comfortable viewing of content in its natural format.

180° swivel stand and complete freedom of placement

The built-in 180° swivel stand makes it easy to direct the image exactly where you want to watch it. You can project content onto a wall, screen, or even the ceiling without needing additional mounts. Four projection modes allow you to set up the projector in front, rear, or ceiling configurations, making it easy to adapt to any room.

An image perfectly suited to any space

Automatic keystone correction and manual focus adjustment let you quickly achieve a straight and clear image, even if the projector isn't positioned perfectly in front of the screen. This makes setup a breeze, and the result looks sleek and professional. It's a particularly convenient solution when the device is frequently moved and used in different locations.

Wireless image transmission without unnecessary cables

Dual-band Wi-Fi 802.11a/b/g/n/ac on the 2.4 GHz and 5 GHz bands enables stable screen mirroring from smartphones, tablets, and computers. The projector works with devices running Android, iOS, Windows, and macOS, allowing you to quickly share videos, photos, and presentations. Bluetooth, on the other hand, allows you to connect the N-150 to compatible speakers or other audio devices.

Built-in media player

The projector can independently play videos, music, and photos stored on a USB drive. It supports popular video formats such as MP4, RMVB, AVI, RM, and MKV; audio files including MP3, WMA, OGG, FLAC, and WAV; and photo formats like BMP, PNG, and JPEG. This means you can play a wide range of content without needing to connect a computer or an external media player.

2 x 3 W stereo speakers and expandable audio system

Two built-in 3 W speakers each provide clear sound during everyday use of the projector. This is a convenient solution when you want to quickly start a viewing session without connecting additional equipment. If you want a more powerful and immersive sound, you can use the 3.5 mm audio output or connect the projector to a Bluetooth speaker.

Versatile ports for various video sources

The Philips N-150 is equipped with an HDMI port, a USB-A port, and a 3.5 mm audio output. The USB-A port supports both external storage devices and powering streaming dongles with 5 V / 1 A. The package also includes a USB-C to HDMI cable, which makes it easy to connect compatible mobile devices and computers.

Included:

- Projector
- Remote control
- 2 AAA batteries for the remote control
- USB-C to HDMI cable
- 4 AC power cables with AUS, EU, UK, and US plugs
- Quick start guide
