Aprašymas

Used with DJI Neo to achieve immersive flight in first-person view.

When used with DJI RC Motion 3, you can treat RC Motion 3 as an AR cursor to navigate the menu on the goggles' screen. Users can navigate the goggles menu with RC Motion 3 instead of using the goggles' 5D button or touch panel, streamlining the operation process. Mouse-like selection greatly enhances efficiency over button navigation.

The interactive beginner tutorial is designed based on real flight operations, reducing the learning curve for users and enabling them to quickly get started.

The headband and battery are combined into one unit. This not only balances the overall weight distribution but also optimizes the wearing experience.

New one-tap defogging feature to enhance visibility. When fog builds up on the surface of the goggles' lenses, activating this feature will cause the internal fans to briefly accelerate to their highest speed, allowing rapid air circulation to clear away the condensation.
