Magcubic HY320MINI Projector

The Magcubic HY320 MINI is a portable projector that combines a native resolution of 720p (1280 × 720), 4K content support, 300 ANSI lumens of brightness, and a high contrast ratio of 10,000:1, delivering a clear and dynamic image in various conditions. The device can display images ranging from 30 to 200 inches in diagonal. The built-in Android 11 system, Hi-Fi speaker, fast Wi-Fi 6 with speeds up to 1800 Mbps, and Bluetooth 5.0 allow the projector to function as a standalone entertainment hub—no need to connect additional devices. Weighing approximately 0.74 kg and featuring a 180° swivel mechanism, it offers enhanced portability and convenience for use both at home and on the go.

Clear image and depth of detail

The projector offers a native resolution of 720p with full support for 4K and Full HD signals, allowing you to easily use modern image sources. A brightness of 300 ANSI lumens combined with an

impressive 10,000:1 contrast ratio results in a clear image with well-defined details and deeper blacks, which is particularly important when watching movies and TV shows. The use of LED technology enhances color intensity and image stability, ensuring that every scene looks natural while maintaining high visual quality and remaining easy on the eyes even during extended viewing sessions.

Android 11 and access to thousands of apps

The built-in Android 11 system allows the projector to function as a standalone multimedia device. You can enjoy access to over 4,000 apps, including popular streaming platforms such as YouTube, Netflix, and Prime Video—without needing to connect a laptop or additional devices. The home viewing experience is complemented by a built-in Hi-Fi speaker, which delivers high-quality sound without the need for external speakers. The intuitive interface allows you to quickly switch between apps and content sources, making it convenient for everyday use.

Fast and stable wireless connectivity

Dual-band Wi-Fi 6 (2.4 GHz and 5 GHz) provides higher bandwidth of up to 1800 Mbps and lower latency compared to older standards. This directly impacts streaming smoothness and video quality, allowing you to watch movies online without annoying buffering. Bluetooth 5.0 technology, in turn, enables convenient, wireless connection of headphones or external speakers, allowing you to customize your projector experience to your preferences and create an audio system tailored to your needs.

Precise image alignment in any conditions

The projector is equipped with automatic vertical keystone correction with a 30° range and manual horizontal adjustment, ensuring the image retains its correct, rectangular shape even when positioned at an angle. Additional 4-point correction (4P-Trapezoid) gives you full control over each corner, allowing you to precisely adjust the geometry to the projection surface. Digital zoom ranging from 50% to 100% makes it easy to change the image size without having to move the device, and manual focus adjustment via a convenient dial ensures quick and accurate setup of a clear image in any conditions.

Ready for any image source

The device offers a wide range of ports, including HDMI, USB, AV, and a 3.5 mm audio output. This allows you to easily connect modern devices such as game consoles (PlayStation), TV sticks, or laptops, as well as older equipment, such as DVD players. Support for Screen Mirroring (ScreenCast) on iOS, Android, and Windows enables instant, wireless image transmission directly from your smartphone or tablet. Thanks to this high level of versatility, the Magcubic HY320 MINI is perfect as a mobile entertainment center, ready to perform in any setting.

Flexible placement thanks to the 180° design

The integrated 180° swivel design allows you to direct the image exactly where it’s needed—onto a wall or ceiling. This solution eliminates the need for additional mounts or makeshift stands, while significantly enhancing user comfort. The device is designed to be placed on a tabletop, mounted on a tripod, or installed on the ceiling, giving you complete freedom in arranging your space. The ability to watch movies projected onto the ceiling works particularly well in the bedroom, where you can use the projector from a comfortable position.

Manufacturer	Magcubic
Model	HY320MINI
Max. native resolution	720p
Max. brightness	300 ANSI
Signal support	Up to 4K
System	Android 11
Processor	Allwinner H726
