Magcubic HY310 Projector

The Magcubic HY310 is a compact projector that combines a native resolution of 1080p, 260 ANSI lumens of brightness, and a 10,000:1 contrast ratio with the latest Android 14 operating system. The device also stands out for its light weight (just 610 g), automatic image adjustment (auto focus and auto keystone), and the ability to project a screen up to 150 inches in diagonal. Thanks to its 80-100% zoom function, 4K support, and built-in smart system, the projector serves as a mobile entertainment hub—both at home and on the go.

Compact and lightweight—take it wherever you want

The projector weighs only about 610 g—which means it's lighter than even some tablets. Thanks to its compact design, it fits easily into a bag or backpack, allowing you to take it on a trip, to a get-together with friends, or out to the garden. It's a device you can always have on hand and quickly set up anywhere!

Great image quality

The native 1080p resolution delivers a crisp and detailed image, while the 260 ANSI lumens brightness and 10,000:1 contrast ratio ensure clarity and distinct differences between light and dark areas of the scene. 4K signal support enhances compatibility with modern sources, allowing you to enjoy a wide variety of content without limitations.

Automatic image adjustment - quick setup

The projector is equipped with features that simplify its setup. Auto Focus automatically adjusts the image sharpness, while Auto Vertical Keystone ensures correct aspect ratios. Additionally, manual 4P correction is available, allowing you to adjust the projection to the surface even more precisely. Meanwhile, the 80–100% zoom function allows you to change the image size without having to reposition the projector.

A large image even in a smaller room

The HY310 model delivers a large screen even from a relatively short distance. At just 1.2 m, you can get an image with a diagonal of about 75 inches; at 1.8 m, about 100 inches; and at 2.6 m, up to 150 inches. This makes the projector well-suited for various spaces—from smaller rooms to larger venues.

Android 14 - Convenient Access to Your Favorite Apps

The built-in Android 14 system provides quick access to apps and content without the need to connect additional devices. With it, you can freely use popular platforms such as YouTube, Prime Video, HBO Max, and Hulu. For even more convenient operation, we recommend using Air Mouse mode, which makes navigating the interface easier.
