Aprašymas

Huanuo HNDS8 double monitor mount 13-32"

The Huanuo HNDS8 dual monitor mount is the ideal solution for those who want to increase the efficiency of their work and immerse themselves in immersive viewing. Thanks to the unique design of the two mounts, you can enjoy the simultaneous use of two monitors, which significantly increases the efficiency and comfort of your work, and the high-quality materials of the mount provide additional safety for the user and his equipment. Ideal for gamers, graphic designers or illustrators, the mount will find its use in any situation.

Comfortable work on two monitors

The mount supports monitors up to 32 inches, allowing you to work on two large screens simultaneously. This solution provides not only a larger working surface, but also greater comfort, especially for taller people, thanks to the higher and longer reach of the arms. Opt for maximum comfort and professionalism.

Flexibility at every step

The Huanuo HNDS8 is designed for maximum flexibility. You can customize every part of the mount with a +45° to -45° tilt angle adjustment, 90° left and right rotation, and the ability to fully rotate monitors 360°. In addition, the option to stack monitors vertically allows you to use your workspace even more ergonomically and comfortably, whether you are working sitting or standing.

Ergonomic workspace management

With the HNDS8, you can easily manage your workspace. With a higher and longer arm reach, this mount allows you to comfortably use monitors, adjusting them to your chosen working positions. Two mounting methods - using a C-clamp and a grommet - make installation of the mount quick and hassle-free. In addition, the cable management capability hides cables, ensuring a neat and tidy workstation appearance.

Durability and reliability for larger monitors

The Huanuo HNDS8 dual monitor mount is designed with durability and reliability in mind. The sturdy arms, set on a sturdy steel pole, are capable of supporting monitors weighing up to 9 kg each. The product has been tested 20,000 times, confirming its high quality and reliability. Built-in gas springs ensure smooth and effortless adjustment of the monitors' positions, which translates into productivity and comfort for years to come.
