Fiber optic cable is highly resistant to EMI and RFI interference

Premium metal connectors

Gold plated connectors for perfect image quality

Compatible with all devices that support HDMI

- HDMI Active Optical Cables (AOC) use fiber optic technology to transport the digital HDMI signal. This means that the signal can be carried much further than with a traditional copper cable (up to 100 m), and reduces the risk of EMI/RFI interference. HDMI AOC cables also have dedicated copper power wires inside, so no external power supply is required.
