ports on the laptop.

The cable supports up to 20 Gb/s data transfer and also allows image transfer up to 8K/60Hz Full Ultra HD resolution and audio. The cable is compatible with charging technologies Power Delivery up to 240W (depends on the extension cable), Quick Charge, Samsung AFC, Huawei FCP, SMART and others. Connected devices can be charged with up to 5A current.

Durable data and power cable with extended service life is equipped with metal terminals, connectors with a nickel-plated surface and gold-plated contacts. Cable conductors are made of Tin-plated oxygen free copper. High-quality cable insulation, made of flexible TPE, guarantees maximum durability and also maintains sufficient flexibility. The nylon braid gives the cable ultimate strength. Power cables 22AWG (lower number = larger cross-section and lower wire resistance) guarantee fast charging of phones and other mobile devices. Data wires 32AWG together with high-quality shielding, ensure reliable data transmission. Triple shielding protects transmitted signals from adverse interference.

Nylon braid in combination with a cable gland significantly reduces dangerous cable bending. The cable life is extended to more than 8000 standard bends. The mechanical resistance of the cable is also increased by the aluminum terminal covers.
