Aprašymas

Neewer CB200C RGB LED Light

Creating polished photos and videos requires lighting that can keep up with any idea. The NEEWER CB200C RGB offers 200W of power, extensive light customization options, and an advanced RGBWW system, making it ideal for both studio shoots and on-location work. High brightness, natural color reproduction, and a wide range of effects let you create exactly the atmosphere you need—from subtle portraits to dynamic film scenes. A sturdy metal construction, compatibility with the Bowens mount, and convenient app control make this equipment ready for intensive, professional use.

Powerful and even light for photo and video

The CB200C is equipped with a high-performance 200W COB LED that generates light with an intensity of up to 23,000 lux per square meter. This allows you to easily illuminate a photo shoot, a streaming setup, a product shoot, or a podcast recording. The light provides even, flicker-free illumination, which is crucial during filming. High CRI 97+ and TLCI 98+ ratings ensure natural color reproduction, so your footage looks professional right from the recording stage.

Advanced RGBWW system and full color control

The NEEWER CB200C RGB offers immense creative possibilities thanks to its three lighting modes. CCT mode allows you to adjust the color temperature from 2500K to 7500K and use smooth dimming from 0 to 100% along with GM correction ranging from -50 to +50. HSI mode provides

access to up to 36,000 colors generated across a full 360° range, and also allows you to adjust light saturation with 90% coverage of the Rec. 2020 color gamut. Additionally, 17 FX effects are available to help you quickly create realistic scenes and atmospheric shots without the need for additional accessories.

App control and simultaneous operation of multiple lights

Working on a larger set becomes much more convenient thanks to support from the NEEWER app. Infinity technology allows for simultaneous control of up to 256 lights compatible with the brand’s ecosystem within a range of up to 15 meters. The built-in 2.4G module also allows you to control lighting groups within a 20-meter radius on the same channel. The app also supports wireless OTA updates, so the light can receive new features and improvements without the need for cables.

Quiet operation and effective cooling

The built-in cooling system is designed for use during audio and video recording. The fan starts at a low speed, and its RPM automatically increases only after reaching a certain temperature. This effectively protects the components from overheating while minimizing noise that could interfere with the recording. As a result, the light is ideal for filming interviews, podcasts, or streams in quiet environments.

Robust construction and wide compatibility

The aluminum housing ensures high durability and resistance to heavy use. The Bowens mount and hot shoe allow for easy attachment of softboxes, beauty dishes, reflectors, snoots, and other light modifiers. The mounting adapter allows you to adjust the lamp’s angle within a 360° range, making it easy to precisely adjust the lighting to the scene. The kit also includes a standard reflector that amplifies the light and protects the LEDs, while the color HD screen streamlines the configuration of operating parameters.

Expand your studio with the NEEWER ecosystem

The CB200C RGB is compatible with a wide range of NEEWER accessories, allowing you to easily tailor the setup to your own workflow. The light is compatible with, among others, the NS55P and NS90P parabolic softboxes, the NS20L and NS35L lantern softboxes, the LD55 beauty dish with grid, the LS-39 Spotlight Snoot Kit, and the RF-60 5-in-1 reflector. It also works seamlessly with the ST-300AC and ST-400AC tripods, as well as the ST-C-CBAC C-stand. An additional advantage is its compatibility with SmallRig accessories, which gives you even greater freedom to expand your workspace.

Included

- CB200C RGB LED light
- Standard reflector
- Protective cover
- Diffuser
- Power cable
- User manual

Manufacturer	Neewer
Model	CB200C
Product Type	Fixed LED video lighting
Compatibility	Accessories with Bowens mount
Applications	Portrait photography, video
Key features	App control/2.4 GHz
Mounting points	Bowens mount

Main material	Aluminum alloy
COB	√
Maximum power	200 W
Maximum illuminance	23,000 lx/m
Color temperature	2,500 K–7,500 K
Color mode	Warm/Cool/RGB
CRI/TLCI	97+/98+
Special lighting effects	17
Wireless app control	√
2.4 GHz wireless control	√
Dimensions	34.5 x 16 x 12 cm
Weight	2.2 kg
