Lepro F1 50W Floodlight

The Lepro F1 50W is a smart LED floodlight designed for illuminating gardens, driveways, building facades, patios, and other outdoor spaces. It offers 50W of power, a wide 100° beam angle, full RGB color control, and support for 2.4 GHz Wi-Fi and Bluetooth. Thanks to AI features, voice control, schedules, and the ability to group devices, it allows you to conveniently create impressive and functional lighting tailored to any occasion.

AI-powered smart lighting scenes

The floodlight utilizes LightGPM AI technology, which is based on knowledge of color psychology and lighting design. The system helps you select colors, brightness, and lighting effects suitable for various applications, such as garden lighting, yard lighting, path lighting, or party decorations. Pre-set scenes can be further customized in the app, adjusting their brightness, speed, and color combinations to your preferences.

Millions of colors and full control over the light

The Lepro F1 offers a wide range of RGB colors and a smooth brightness adjustment feature. Thanks to this, it can serve both as decorative lighting and as striking ambient lighting for outdoor gatherings. The ability to create your own lighting scenes makes it easy to tailor the ambiance to the occasion and mood.

Music synchronization and voice control

The LightBeats feature allows you to synchronize lighting effects with music played on your smartphone. The lighting reacts to the rhythm of the sound, creating dynamic effects without harsh flashes. Additionally, the system supports voice commands, allowing you to change scenes, activate lighting, or launch preset modes with simple voice commands.

Device grouping and smart automation

The Lepro app allows you to control multiple compatible devices simultaneously. The grouping feature allows you to manage the entire lighting system from a single panel, while schedules and timers automate the daily operation of the lights. This allows the lighting to turn on and off automatically at selected times.

Weather resistance

The housing meets IP65 rating requirements, ensuring protection against rain and other weather conditions. The floodlight can be mounted using either a ground spike or a wall bracket, making it easy to adapt the installation method to the mounting location.

App control and smart home integration

The Lepro F1 works with the Lepro APP, Amazon Alexa, and Google Assistant. With support for 2.4 GHz Wi-Fi and Bluetooth, users can control the lighting locally or remotely using a smartphone or voice commands. Note: This model is not compatible with the Lepro LampUX or Smart Life apps, nor with traditional remote controls.

Manufacturer	Lepro
Model	F1
Power	50 W
Dimensions	approx. 182 x 177 x 32 mm
Weight	approx. 800 g
Voltage	220-240 V, 50/60 Hz, 0.24A
Water resistance	IP65
Color technology	RGB
Dimming	Yes
Beam angle	100°
Connectivity	2.4 GHz Wi-Fi, Bluetooth
Control	Lepro APP, voice control

Compatible voice assistants Amazon Alexa, Google Assistant

AI technology LightGPM AI
