Aprašymas

Freewell 3x 17mm Telephoto Lens

The Freewell 3x 17mm Telephoto Lens is designed for iPhone and Samsung smartphone users who want to achieve even better results when taking photos and recording videos. This model is designed to work with the main camera set to 4x or a telephoto lens offering 5x magnification or higher, allowing you to take full advantage of the capabilities of modern smartphones. The 3x optical zoom brings subjects closer without compromising image quality, preserving natural perspective and high detail in your shots.

Macro Photography from a Greater Distance

The 72 mm focal length equivalent provides a narrower field of view, which makes it easier to highlight details, textures, and small objects, effectively separating them from the background. The lens also excels at macro photography—it allows you to take impressive close-ups from a greater distance, making it easier to capture fine details without having to bring your smartphone close to the subject. It’s a great choice for photographing nature, products, jewelry, or other small objects.

Compatibility with the 17 mm mounting system

The lens is equipped with a standard 17 mm mount, making it compatible with dedicated cases, housings, and frames that use this system. Its sturdy construction and easy installation let you quickly get your smartphone ready for use and expand its photographic capabilities, whether you’re creating content for social media or aiming for more professional shots.

Manufacturer	Freewell
Model	FW-SH-17TP3X
Compatibility	iPhone and Samsung smartphones equipped with a 17 mm mount
