Pagrindinės savybės

- ✓ 80.0cm (31.5") Full HD 1920 x 1080 LED VA
- ✓ 1ms, 16:9, 300cd/m², 3000:1
- ✓ USB, HDMI, DisplayPort

Aprašymas

TUF Gaming VG328QA1A is a 31.5-inch Full HD (1920 x 1080) gaming monitor with an overclocking 170Hz refresh rate and 1 ms (MPRT) response time for extremely immersive gameplay. It features exclusive Extreme Low Motion Blur (ELMB) technology and AMD FreeSync™ Premium to eliminate ghosting and tearing. In addition, it also features 100% sRGB color gamut ensures exceptional contrast and color performance.

GAMING KEY SPEC

170HZ REFRESH RATE(OC) AND 1MS (MPRT) RESPONSE TIME

TUF Gaming VG328QA1A delivers stunning visuals from all angles. With overclock to 170Hz refresh rate decimates lag and motion blur to give you the upper hand in first person shooters, racers, real-time strategy, and sports titles. This ultrafast refresh rate lets you play at the highest visual settings and lets you react instantly to what's onscreen — so you'll get that first strike in.

GAMING KEY SPEC

ADAPTIVE-SYNC

AMD FreeSync Premium technology supported through DP and HDMI ports providing variable refresh rates for low latency, stuttering-free and tearing-free while gaming.

EXCLUSIVE GAMING FEATURE

EXTREME LOW MOTION BLUR (ELMB)

ASUS Extreme Low Motion Blur (ELMB) technology provides a 1 ms MPRT response time to eliminate smearing and motion blur. It makes moving objects appear even sharper, so gameplay is more fluid and responsive.

EXCLUSIVE GAMING FEATURE

VARIABLE OVERDRIVE

Integrated ASUS Variable Overdrive technology allows the display to dynamically alter its overdrive setting as frame rates fluctuate, ensuring optimal results for any game. You choose how strong you want the overall effect to be, then let the monitor take it from there.

INTUITIVE CONTROLS

DisplayWidget Center software upgraded the user interface so that users can easily change monitor settings via a mouse — so there's no need to access the OSD menu.

SHADOW BOOST

ASUS Shadow Boost technology clarifies dark areas of the game without overexposing brighter areas, improving overall viewing while also making it easier to spot enemies hidden in dark areas of the map.

GAMEPLUS

The ASUS-exclusive, integrated GamePlus hotkey offers in-game enhancements that help you get more out of your game. This function is co-developed with input from pro gamers, allowing them to practice and improve their gaming skills.

GAMEVISUAL

ASUS GameVisual Technology has seven pre-set display modes to optimize visuals for different types of content. This unique feature can be easily accessed through a hotkey or the on-screen display settings menu.

FLICKER-FREE TECHNOLOGY

Flicker-Free technology reduces flicker to minimize eyestrain for improved comfort when you're embroiled in long gaming sessions.

LOW BLUE LIGHT

ASUS Low Blue Light technology reduces the amount of potentially harmful blue light emitted by the display. Four different filter settings are available to control the amount of blue light reduction.

EXTENSIVE CONNECTIVITY

A multitude of connectivity options, including two HDMI 2.0, plus DisplayPort™ 1.2, ensures wide compatibility with a variety of input sources.

ERGONOMIC DESIGN

With an ergonomically-designed stand, it provides tilt so you can easily find your ideal viewing position. The display is also VESA-compatible for wall mounting.
