Modelis: STV1-5-EU

Gamintojas: LEPRO

EAN: 4894495046287

Prekės kodas: 582715

97.99€

Lepro STV1 Wi-Fi LED Strip, 5 m

The Lepro STV1 is a smart TV backlight that dynamically synchronizes colors with the image displayed on the screen. Thanks to LightIMS™ technology and a real-time image-scanning camera, the strip replicates the colors and effects visible on the screen, creating a more immersive experience while watching movies, sports broadcasts, anime, or gaming. Additionally, it offers AI-powered scenes, music synchronization, and support via the Lepro APP, Amazon Alexa, and Google Assistant.

Dynamic real-time image synchronization

LightIMS™ technology uses a dedicated chip that processes the image directly from the camera to the lighting controller. The system captures images at 30 frames per second, ensuring a quick response to changes displayed on the screen. Thanks to optimized processing, color synchronization occurs without noticeable delays, resulting in smooth and natural lighting effects.

Precise screen color reproduction

A camera positioned above the TV analyzes the image and assigns the detected colors to the corresponding segments of the LED strip. AI-Powered Pixel-Perfect True Gradient RGB technology enables accurate reproduction of color transitions and effects visible on the screen. As a result, the backlight smoothly adapts to the movies, sports broadcasts, animations, and games you're watching, enhancing the sense of immersion in the content.

AI Smart Scenes and Music Sync

The Lepro STV1 utilizes LightGPM™ 4 technology, which offers additional lighting scenes tailored to various types of entertainment. The AI-Match Team Colors feature can detect team colors during sporting events and adjust the ambient lighting accordingly. The LightBeats™ feature is also available, which synchronizes the light with music to create smooth lighting effects.

Voice control and convenient operation

The strip works with Amazon Alexa, Google Assistant, and the Lepro APP. This allows you to conveniently control the lighting using voice commands, change settings, activate lighting scenes, and customize the system's operation without having to reach for a remote or phone.

Quick installation

The installation is designed to be as simple and aesthetically pleasing as possible. Attach the LED strip along the back edge of the TV and mount the camera in the center of the screen's top bezel. Once powered on, the system is ready to operate and automatically synchronize lighting effects with the displayed image.

Included

- LED strip
- Camera
- Mounting brackets for LED strip ×16
- Adhesive pad for camera
