The Natec Aracanta is a versatile midi-tower chassis designed for flexibility and efficient airflow. Featuring a metal and ABS plastic construction, this tower supports a variety of motherboards including ATX, microATX, and Mini-ITX, providing ample space for different configurations. With a total of six internal bays and three free expansion bays, users can easily customize their setups to suit personal needs. The design also includes front panel connectors for USB and audio, making the Aracanta a practical choice for connectivity and accessibility.
