GODOX LUX Senior Retro Flash

Enjoy a unique atmosphere while shooting and create images with a one-of-a-kind character. The GODOX Lux Senior is a flash that stands out not only for its capabilities but also for its distinctive design inspired by classic photography. When folded, it's only slightly larger than an average smartphone, so it fits easily into a camera bag, and when unfolded, it reveals a distinctive reflector that gives it a one-of-a-kind look.

A design that stands out at every shoot

The most distinctive feature of the Lux Senior is its foldable reflector. The folded design makes it easy to transport and store, and when unfolded, the flash takes on a striking appearance reminiscent of classic cameras. This design makes the light ideal for both creative photo shoots and everyday photography, adding a special atmosphere to your work with the camera.

Intuitive Operation and Light Control

The Lux Senior offers two operating modes, allowing you to easily adapt its performance to your own photography style. Auto mode (A) lets you focus on capturing the moment without having to manually adjust settings, while manual mode (M) gives you full control over the flash and exposure. Smooth power adjustment directly from the flash unit further simplifies the precise adjustment of lighting to the scene being photographed.

Flexible Flash Triggering

The flash is equipped with optical trigger modes S1 and S2 and supports M, S1, S2, and Slave modes, making it easy to work with other light sources during complex photo shoots. In S1 mode, the flash fires when it detects the flash from another manual or TTL flash, while S2 mode ignores the pre-flash, which enhances convenience when working with more advanced lighting setups. An additional advantage is the SYNC connector, and the included cable allows you to get started quickly.

Built-in Battery and Wide Compatibility

The Godox Lux Senior uses a built-in lithium battery, eliminating the need for replaceable batteries. The color temperature is 6000 K (± 200 K), and compatibility with Canon, Fujifilm, Nikon, Olympus, Pentax, and Sony MIS cameras allows the flash to be used with many popular photography systems.

Included:

- Flash
- Storage case
- Sync cable
- USB cable
