GODOX AD-B2 S Dual Head for AD200 Flashes

The GODOX AD-B2 S Dual Head allows you to combine two GODOX AD200 flashes into a single, powerful 400 W setup. This allows you to achieve greater flash power without having to use two separately positioned light sources, making it easier to light larger photo sets and work with complex light modifiers. An additional advantage is the 2 × 20 W LED modeling light, which allows you to conveniently assess the lighting effect before taking the photo.

Greater convenience during every session

The 2 × 20 W LED modeling light makes it easier to set up the lighting and fine-tune the composition, making session preparation run more smoothly. There's no need to use two separate studio lights to enjoy the benefits of efficient modeling light. It's a practical solution that streamlines your work both in the studio and when shooting outdoors.

Stable Mounting and Flexibility in Positioning
