

## GODOX TT350 TTL Flash for Fujifilm

Modelis: TT350F

Gamintojas: GODOX

EAN: 6952344211540

Prekės kodas: 584504

# 99.99€

### GODOX TT350F Flash for Fujifilm

The GODOX TT350F flash for Fujifilm is a compact model with a guide number of 36, designed for Fujifilm mirrorless cameras. It supports TTL auto mode, HSS flash synchronization up to 1/8000 s, and the Godox X wireless system with Master and Slave functions. It weighs just 210 g, and when the head is tilted forward, its height is only 9.5 cm, making it a great fit for compact cameras and keeping your photography setup lightweight. The set includes a diffuser, a stand, a carrying case, and the original packaging. To get started, you'll need to purchase two AA (R6) batteries, which are not included in the set.

### Compact Design for Everyday Photography

The Godox TT350F was designed with mirrorless camera users in mind, so its small size complements compact camera bodies well. The flash measures 14 × 6 × 3.5 cm and weighs 210 g, so it takes up very little space in a camera bag. When mounted on the camera and with the head

positioned forward, it reaches a height of just 9.5 cm, which makes it more comfortable to use while shooting on location. The lightweight design makes extended use of the camera more comfortable, and the kit itself remains well-balanced.

## **Adjustable Head and Light Control**

The flash head rotates 270° horizontally and from -7° to +90° vertically, making it easy to bounce light off walls and the ceiling. This allows you to achieve softer, more natural-looking lighting without the need for additional accessories. The built-in zoom operates within a range of 24–105 mm and can function in both automatic and manual modes, adjusting the beam angle to match the lens's focal length. The head also features a wide-angle diffuser corresponding to a focal length of approximately 15 mm and a reflector, and the kit includes an additional diffuser to soften the light.

## **Various operating modes and the Godox X wireless system**

The flash offers a TTL mode that automatically adjusts the flash output, making it easier to shoot in varying lighting conditions. A manual mode with S1 and S2 functions is also available, as well as a Multi-strobe mode, which allows for multiple flashes during a single exposure. The built-in Godox X system transmitter allows you to control other compatible strobes as a Master unit or operate as a Slave unit controlled by an external trigger. This allows the TT350F to be used both as a standalone flash and as part of a more extensive lighting system.

## **HSS Synchronization and Efficient Operation**

Support for HSS synchronization up to 1/8000 s allows you to use the flash even when shooting in bright daylight with fast shutter speeds. The maximum recharge time is approximately 2.2 seconds, enabling you to take consecutive shots efficiently. Powered by two AA (R6) batteries, the flash delivers a minimum of 200 full flashes per set, depending on the quality of the batteries used. Additionally, the manufacturer has equipped the flash with a micro USB port, which allows you to update the firmware and take advantage of the latest improvements.

## **Included in the set**

- Godox TT350 flash
