GODOX V100N Flash for Nikon

The GODOX V100N flash for Nikon is an advanced 100 Ws photojournalism model equipped with TTL auto mode, HSS mode, power adjustment from 1/1 to 1/256, and the built-in Godox X 2.4 GHz wireless system. Thanks to its compatibility with Nikon cameras and support for shutter speeds up to 1/80,000 s, it's ideal for sports, photojournalism, and portrait photography, as well as for working in challenging lighting conditions. The model features a 2.3-inch color touchscreen, a high-capacity battery capable of delivering up to 400 full-power flashes, and a fast recharge time of up to 1.7 seconds. It's a versatile flash for photographers who expect high power, fast performance, and convenient operation during every photo shoot.

High power and fast performance during every session

The 100 Ws power output provides great flexibility, whether you're lighting subjects or illuminating larger photo sets. Power adjustment ranging from 1/1 to 1/256 allows you to precisely adjust the

flash intensity to current conditions, making it easier to achieve the desired effect without the need for multiple test shots. Support for TTL and HSS modes allows you to shoot with very fast shutter speeds, which is ideal for dynamic events and photos taken in direct sunlight. An advanced cooling system allows you to fire 70 to 100 full-power flashes without the risk of overheating, ensuring greater continuity during intensive shooting sessions.

Intuitive operation and flexible lighting options

The 2.3-inch color touchscreen allows you to quickly change settings and conveniently switch between operating modes, significantly streamlining the flash's operation. The swivel head, with a wide adjustment range of -7° to +120° vertically and 330° horizontally, makes it easy to bounce light off ceilings and walls, allowing you to achieve more natural and soft lighting for your subject. An additional advantage is the detachable SU-1 flash module, which effectively illuminates the foreground even when the main flash head is pointed upward. The built-in 2 W LED modeling light with 10-step brightness adjustment makes it easy to assess lighting effects before taking a photo.

Powerful Battery and Comprehensive Godox System

The VB30 battery, with a capacity of 2,980 mAh, allows for up to 400 full-power flashes, making the flash ideal for long photo sessions and photojournalism. Charging via the USB-C port enhances convenience, and the ability to connect an external PB960 power module reduces the flash's recharge time to as little as approximately 0.8 seconds. Compatibility with a wide range of Godox accessories, including the AK-R1 magnetic kit, projection caps, and the S2 mount for Bowens modifiers, allows you to easily expand your kit with additional tools for creative lighting.

Included in the set

- GODOX V100N flash for Nikon
- VB30 battery
- SU-1 module
- USB cable
- Power adapter
- Mini tripod
- Carrying case
