

GODOX X3 TTL Remote Trigger for Fujifilm

Modelis: X3 F

Gamintojas: GODOX

EAN: 6952344234709

Prekės kodas: 584509

99.99€

GODOX X3 F Trigger for Fujifilm

The GODOX X3 F Trigger for Fujifilm is a modern TTL radio transmitter that combines a compact design with convenient and intuitive operation. Its small size and minimalist design mean the device takes up very little space on the camera, while still providing full control over compatible flashes operating in the Godox X 2.4 GHz system. It's a practical solution for both studio photography and outdoor shoots.

Touchscreen Interface and User-Friendly Operation

The GODOX X3 F is equipped with a modern touchscreen that works in conjunction with physical buttons, providing quick access to key functions. The intuitive interface makes configuring the device easy, even during fast-paced photo shoots. The trigger supports TTL, manual, and Multi Flash modes, as well as HSS synchronization with fast shutter speeds and first- and second-curtain synchronization, offering great flexibility when shooting.

Clear OLED Screen

The touchscreen OLED display provides high contrast and a smooth refresh rate, ensuring that all settings remain legible in various lighting conditions. Screen brightness can be conveniently adjusted using swipe gestures, allowing you to tailor it for studio or outdoor use. An additional safety feature is the screen lock function, which prevents accidental changes to settings.

Seamless switching between TTL and manual mode

The bidirectional TCM function allows for instant transfer of settings between TTL and manual modes. This allows the photographer to start with automatic flash metering and then switch to manual adjustment with a single gesture, retaining the selected values and gaining greater control over the final result.

Stable radio transmission

The trigger works with the Godox X 2.4 GHz wireless system, enabling reliable control of compatible flash units and other devices. The automatic channel scanning feature helps reduce the risk of interference caused by other transmitters operating on the same band. The model also offers a high-speed sync function, expanding your flash photography capabilities.

USB-C Charging

The GODOX X3 F is equipped with a high-capacity lithium battery that can be charged from 0 to 100% in approximately 2 hours using a USB-C cable. The USB-C port is also used to install software updates, allowing you to keep the device up to date.

Package Contents

- GODOX X3 F Trigger for Fujifilm
- USB-C Cable
- Protective case
- Box
