Godox V100 Flash for Canon

The Godox V100 Flash for Canon sets a new standard among flagship flash units, offering 100 Ws of flash energy and a wide range of power adjustment from 1/1 to 1/256. This makes it ideal for both subtle fill light and powerful key light during more demanding shoots. Support for TTL, shutter speeds up to 1/80,000 s when used with cameras equipped with a global shutter, and a fast recharge time of up to 1.7 s make the V100 ideal for sports and photojournalism, as well as for working in intense light.

Intuitive operation and full control over settings

The V100 is equipped with a highly responsive 2.3-inch color touchscreen that allows for quick and convenient management of all key functions. The intuitive menu lets you instantly adjust power levels, switch between operating modes, activate additional features, and pair devices with a single touch. This solution significantly streamlines your workflow and lets you focus on taking photos.

Ready for Any Shoot

The VB30 battery, with a capacity of 2,980 mAh, allows for up to 400 full-power flashes, ensuring long operating time without the need for frequent recharging. The flash can be charged via the USB-C port, and when connected to the PB960 external power module, the charging time is reduced to just 0.8 seconds. The built-in Godox X 2.4 GHz system with transmitter and receiver functionality allows it to operate as a master or slave unit, supporting 5 groups, 32 channels, and a range of up to 100 meters. An additional advantage is its compatibility with a wide range of Godox accessories and modifiers, which makes it easy to expand your lighting setup.

Even Greater Lighting Flexibility

The detachable SU-1 flash module allows you to illuminate the foreground even when the main head is pointed, for example, at the ceiling. This solution expands your possibilities in portrait and event photography. The built-in 2 W LED modeling light with 10-step brightness adjustment allows you to conveniently assess the lighting effect before taking a photo or use the light as additional scene illumination.

Long Run Time and Flexible Power Supply

The VB30 battery, with a capacity of 2980 mAh, allows for up to 400 full-power flashes, ensuring extended operation without the need for frequent recharging. The flash can be charged via a USB-C port, and compatibility with the Godox VC26T charger (sold separately) offers additional charging options. The model also features a socket for connecting the PB960 external power module, which, when connected, reduces the flash's recharge time to just 0.8 seconds.

Included in the set

- Godox V100 Canon flash x1
- VB30 battery x1
- SU-1 module x1
- USB cable x1
- Power adapter x1
- Mini stand x1
