GODOX V480N Flash for Nikon

The GODOX V480N flash is a versatile solution for photographers using Nikon cameras, combining a compact design with high performance. A guide number (GN) of 50 ensures high flash output, and the high-capacity 7.2 V / 2200 mAh Li-ion battery allows for up to 650 full-power flashes. A short recharge time of up to 1.7 seconds means the flash is ready for the next shot almost immediately, making it ideal for event coverage, portrait sessions, and outdoor photography.

Convenient operation and quick setting adjustments

The V480N features a 2.0" color screen that, combined with physical buttons, ensures convenient and intuitive operation. Settings can be adjusted efficiently without interrupting shooting, allowing you to react instantly to changing conditions. The intuitive menu makes it easy to fine-tune settings for both those who prefer touchscreen controls and those who prefer traditional button operation.

Full control over lighting

The flash offers TTL, Manual, and Multi modes, allowing you to adapt its operation to various scenes and shooting styles. Available flash compensation and first- and second-curtain sync make it easier to achieve the desired effects and create the right dynamic range in your photos. The HSS high-speed sync function up to 1/8000 s allows you to shoot with a wide aperture even in bright light, providing greater control over exposure and background appearance.

Wireless operation and flexible control

The built-in 2.4 GHz radio system allows the flash to function as both a transmitter and a receiver. Support for 32 channels and an operating range of up to 100 meters let you conveniently control multiple flashes without the need for additional triggers. This solution simplifies the setup of a mobile lighting system and provides greater freedom during more demanding photo shoots.

Powerful Performance and Flexible Light Shaping

The lithium-ion battery ensures long runtime, and the USB-C charging capability allows you to conveniently recharge the flash using a power bank. The flash head tilts from -7° to 120° and rotates 330°, making it easy to bounce light off walls and the ceiling to achieve more natural lighting. The built-in fill light panel and wide-angle diffuser allow you to quickly change the character of the light and adapt it to your current needs without the need for additional accessories.

Included

- Flash x1
- Mini tripod / stand x1
- Carrying case x1
- Lithium-ion battery x1
- Diffuser x1
- Adapter / power supply x1
- USB-C cable x1
