GODOX V850III Flash

The Godox V850III is the third generation of a news flash, offering even greater flexibility thanks to an expanded head adjustment range from -7° to 120° and horizontal rotation from 0° to 330° . These features make it easier to precisely bounce light off walls and ceilings, allowing you to achieve more natural lighting of the scene you're photographing. The built-in lithium-ion battery provides up to approximately 450 full-power flashes, and the maximum recharge time of 1.5 seconds allows you to work efficiently even during intense photo shoots.

Even greater freedom in directing light

The third-generation V850III is equipped with a head featuring an expanded tilt range, making it even easier to adjust the light direction to suit shooting conditions. The tilt adjustment from -7° to 120° and horizontal rotation from 0° – 330° allow for convenient bounce flash, whether the flash is mounted on the camera or used off-camera. This helps you achieve the desired lighting effect faster and enhances your workflow in various situations.

High-Performance Li-Ion Battery

The V850III model uses an improved lithium-ion battery that is compatible with the Godox V860III flash. The ability to swap out batteries enhances convenience during longer sessions and when working in the field, especially when using multiple Godox flashes. A single full charge allows for approximately 450 full-power flashes, and the flash's recharge time is a maximum of 1.5 seconds, helping to maintain a smooth shooting workflow.

Intuitive Operation and Wireless Compatibility

The control panel is modeled after the latest Godox strobes, ensuring simple and intuitive operation. The built-in 2.4 GHz Godox X system transmitter and receiver enable compatibility with compatible Godox strobes and triggers. When used with the optional transmitter, the flash supports synchronization with short shutter speeds up to 1/8000 s and can be triggered wirelessly when mounted off-camera, such as on a tripod.

Manual Control and Wide Zoom Range

The Godox V850III is a multi-system flash that offers full manual control over flash power. This allows you to precisely adjust the lighting parameters to suit your needs and shooting style. Additionally, the built-in zoom, adjustable from 20 to 200 mm, allows you to properly adjust the beam angle to match the lens you're using and the scene you're photographing.

Included in the set

- Godox V850III flash x1
- Battery x1
- Charger with cables x1
- Stand x1
- Carrying case x1
- Packaging x1

Model	Godox V850III
Head tilt range	-7° to 120°
Head rotation	0°-330°
Number of full-power flashes	Approximately 450
Maximum recharge time	1.5 s
Wireless system	Godox X 2.4 GHz
Operating mode	Manual
Synchronization with optional transmitter	Up to 1/8000 s
Zoom range	20-200 mm
Battery compatibility	Godox V860III
