GODOX MF-R76 Macro Ring Flash

Macro photography allows you to discover details that go unnoticed in everyday life, and the Godox MF-R76 ring flash provides the lighting necessary to capture them. Thanks to its ring-shaped design, which mounts directly onto the front of the lens, the light evenly illuminates the subject, minimizing harsh shadows. It's an excellent choice for both macro photography enthusiasts and those taking photos for scientific or specialized applications.

Even Lighting for Close-Up Photography

The MF-R76's ring design is specifically engineered for photographing small subjects from very close range. Placing the ring light directly on the lens allows you to effectively illuminate the subject without creating harsh shadows, making it easier to capture clear and detailed photos. The ring light is ideal for both studio and outdoor use, providing optimal lighting conditions regardless of the shooting location.

Independent burner control for greater flexibility

The ring light is divided into two independent burners—left and right—whose power can be adjusted separately in the range from 1/1 to 1/128 in 1/3-stop increments. This allows you to achieve perfectly even lighting when you want to faithfully reproduce details, or to intentionally shape the light by adjusting the power settings on both sides. As a result, the MF-R76 offers great freedom when experimenting with lighting effects and tailoring the lighting to a specific scene.

Wide Compatibility with Many Lenses

The Godox MF-R76 works with a wide range of lenses thanks to the included adapter rings. The kit allows for mounting on lenses with diameters of 49, 52, 55, 58, 62, 67, 72, and 77 mm, which increases its versatility. Additionally, the controller is equipped with a hot shoe compatible with most cameras, allowing the flash to be conveniently used with various photography setups.

High-capacity battery for extended operation

The flash is equipped with a high-capacity lithium battery that allows for up to 660 full-power flashes. This high capacity makes it possible to comfortably conduct long photo sessions without the need for frequent recharging. The MF-R76 is also compatible with Godox VB26 lithium batteries used in the V1 and WB100 flash units—which are used in the AD100Pro model—providing greater flexibility during use.

Included in the set

- Godox MF-R76 flash x1
- 49 mm adapter ring x1
- 52 mm adapter ring x1
- 55 mm adapter ring x1
- 58 mm adapter ring x1
- 62 mm adapter ring x1
- 67 mm adapter ring x1
- 72 mm adapter ring x1
- 77 mm adapter ring x1
