GODOX AK-R21 Projection Attachment Set

The GODOX AK-R21 Projection Attachment Set is a flash accessory that allows you to create striking light projections during photo shoots. The set includes a projection attachment, a 65 mm lens, an adapter for round heads, a slide holder, a set of slides, and a carrying case. The kit is compatible with flashes equipped with a round head, such as the Godox AD100Pro, AD200Pro with a round head, or the Godox V1. With the optional adapter for rectangular heads, it can also be used with the Godox AD200Pro with a Fresnel head and select news flashlights from various brands. This is the solution for photographers who want to easily enhance their shots with creative lighting effects.

Create unique lighting effects

The GODOX AK-R21 allows you to project a variety of patterns and motifs onto the background or the subject—ranging from natural landscapes to vintage themes and even futuristic, cyberpunk compositions. This significantly expands the capabilities of a single flash, making it easier and faster

to set up original scenes.

A System Compatible with Various Flash Units

The AK-R21 is a modular projection system that can be adapted to various types of flash units. The kit includes an adapter designed for round heads, so the accessory is immediately ready to work with compatible Godox models. For strobes equipped with rectangular heads—including the Godox AD200Pro with a Fresnel head and classic news flash units—the manufacturer offers an optional adapter sold separately.

Precise Projection Control

The projector can be rotated 360°, making it easy to perfectly position the projected pattern. Additionally, the mounting ring features angle markings, which make precise adjustment of the projection position even easier. You can conveniently preview the effect before taking a photo using the modeling light or the strobe function on compatible Godox lights.

Stable Mounting During Use

The adapter is equipped with a universal 1/4" thread, which allows the attachment to be mounted directly on a lighting stand or a flash unit. This solution improves the stability of the setup and makes it easier to precisely adjust the light direction, especially during longer photo sessions.

Included in the set

- GODOX AK-R21 projection attachment
- 65 mm lens
- Adapter for round heads
- Slide holder
- Demonstration slide
- Logo slide
- Carrying case
- Manufacturer's packaging
