

GODOX FH50R LED Light

Modelis: FH50R

Gamintojas: GODOX

EAN: 6952344230770

Prekės kodas: 584544

235.99€

GODOX FH50R LED Lighting Panel

The GODOX FH50R is an exceptionally lightweight and versatile RGB LED panel that performs well both in the studio and on location. It can be mounted on a lighting stand or used during filming to illuminate moving shots. Mains power ensures uninterrupted operation during long sessions, and the option to use optional NP-F or V-Mount battery holders increases the setup's mobility when shooting outside the studio. This solution allows you to quickly adapt the lighting to dynamically changing working conditions.

A flexible design that adapts to any space

The panel's exceptionally flexible design makes it easy to illuminate areas where traditional lamps would be difficult to use. It fits easily into small rooms, car interiors, or tight spaces, and thanks to its light weight, it can also be mounted on the ceiling. The metal frame retains its shape after being bent, allowing you to direct the light exactly where it's needed—broadly when the panel is unfolded, or more precisely when shaped accordingly.

Natural light and complete creative freedom

The panel's design provides even, soft lighting that reduces harsh contrasts between light and shadow. As a result, images look natural, and in portrait photography, the light helps subtly smooth the skin's appearance and conceal minor imperfections. It's the perfect choice wherever aesthetic, eye-pleasing lighting without harsh tonal transitions is essential.

Millions of colors and special effects at your fingertips

The panel offers full control over light color thanks to 360° HSI adjustment and the ability to set saturation from 0 to 100%. The adjustable color temperature of white light, ranging from 2500 K to 10000 K, allows you to easily adapt the lighting to various conditions and the nature of the scene being shot. Additionally, the built-in FX effects let you quickly create a unique mood—from warm candlelight to dynamic storm effects—making it much easier to set the right atmosphere during video shoots or photo sessions.

Convenient Control for Every Project

The panel is easy to operate both directly on the device and remotely via the Godox Light app. This allows you to quickly adjust lighting settings without having to approach the light, which streamlines workflow during photo shoots, video recordings, and productions carried out by a single person or a larger team.

Included:

- Lighting panel
- AC power adapter
- Power cord
- Lighting tripod mount
- Carrying case
