Modelis: V1 mid N

Gamintojas: GODOX

EAN: 6952344245897

Prekės kodas: 584549

181.98€

GODOX V1 N Flash

The Godox V1 mid is a compact news flash that combines professional-quality light with the convenience of field use. The round head provides soft and even lighting, and a flash readiness time of just 1.7 seconds allows you to react instantly to changing situations. The high-capacity battery allows for approximately 650 full-power flashes on a single charge, making the flash ideal for news coverage, portrait sessions, and other demanding assignments.

Intuitive Operation and Fast Performance

The flash is equipped with a clear touchscreen featuring an intuitive interface that makes it easy to adjust settings and efficiently configure all functions. Adjusting power, selecting operating modes, and configuring the wireless system are quick and convenient, allowing you to focus on shooting rather than on operating the equipment. The short recycle time further enhances workflow comfort during fast-paced sessions.

Natural Light Thanks to Advanced Optics

Godox's advanced optical system and circular head generate soft, natural-looking light with even distribution. Smooth tonal transitions and uniform coverage of the frame result in a professional look in your photos, reducing the need for additional light modifiers.

Complete freedom in lighting control

The Godox V1 mid supports TTL, manual, and stroboscopic (Multi) modes, offering extensive options for tailoring the flash to a specific scene. The flash also supports high-speed sync (HSS) and first- and second-curtain sync, providing greater flexibility when shooting in varied lighting conditions and bringing creative ideas to life.

Powerful Battery Life and Wireless Compatibility

The lithium-ion battery ensures long runtime, and the ability to charge via the USB-C port allows you to conveniently recharge using either a wall charger or a power bank. The built-in Godox X 2.4 GHz wireless system allows the flash to function as both a transmitter and receiver with a range of up to 70 meters and support for multiple groups. The flash is also compatible with AK-R1 magnetic accessories and the S2/S3 bracket, allowing you to use a wide range of modifiers, including those equipped with a Bowens mount.
