Modelis: V100 S

Gamintojas: GODOX

EAN: 6952344239841

Prekės kodas: 584559

397.99€

GODOX V100 Flash for Sony Cameras

The GODOX V100 for Sony cameras is an advanced news flash offering 100 Ws of power with a wide adjustment range from 1/1 to 1/256, making it suitable for both subtle fill light and as a main light source. The model is compatible with cameras equipped with a global shutter, supporting exposure times up to 1/80,000 s and TTL auto mode, making it an excellent choice for sports photography, dynamic shots, and shooting in bright daylight. An efficient cooling system allows for 70 to 100 full-power flashes (depending on the zoom setting) without the risk of overheating, ensuring reliability even during demanding shoots.

Convenient operation and greater creative freedom

The flash is equipped with a 2.3-inch, responsive TFT touchscreen that allows you to instantly adjust power levels, operating modes, functions, and pair devices with just a few taps. The detachable flash module, familiar from the V1 Pro model, allows you to illuminate the foreground simultaneously,

even when the main head is aimed at the ceiling or a wall. This solution opens up new possibilities for portrait and event photography, making it easier to achieve natural-looking light. Additional support comes from the built-in LED modeling light with 10-step brightness adjustment, which makes it easier to assess lighting effects before taking a photo or can serve as a soft fill light.

Long Run Time and Instant Recharging

The GODOX V100 uses the same battery as the V1 Pro model, offering up to 400 full-power flashes on a single charge. The USB-C port allows for convenient recharging, and the battery can also be charged using the optional Godox VC26T charger. The flash is also equipped with a connector for an external PB960 power module (sold separately), which reduces the recharge time between flashes to just 0.8 s. This feature will be appreciated by photographers taking long bursts of photos or working at a fast pace.

Full integration with the Godox X system

The built-in Godox X 2.4 GHz transmitter and receiver allow for wireless control of the flash and triggering via any transmitter from the Godox X system. The V100 can also function as a master unit, controlling other compatible strobes, and the one-touch quick-pairing feature streamlines integration with the Godox X3 trigger and other devices in the system. Wide compatibility with accessories, such as the AK-R1 magnetic kit, the AK-R21 diffusion cap, the AK-R22 dome, or the S2 mount for Bowens modifiers, allows you to easily expand your kit and adapt it to almost any photography style.

Included in the set

- Godox V100 flash for Sony cameras
- VB30 battery
- SU-1 module
- USB cable
- charger
- mini tripod
- carrying case
- user manual
