LG 75XS4P-B 75" Public Display

The LG 75XS4P-B is a 75-inch digital signage flat panel designed to capture attention with its brilliant display. Featuring a TFT/LCD flat screen with LED technology and a stunning 4000 cd/m² brightness, this display ensures your content is vibrant and visible, even in window-facing environments. With UHD+ resolution, the display delivers crystal-clear images, enhanced by the webOS 6.0 platform for seamless content management.

- **UL Verification:** World's First UL Verification for Display Anti-Discoloration Characteristics, preventing 'screen-yellowing'.
- **High Brightness:** 4,000 nits brightness ensures visibility in window-facing environments and attracts customers.
- **webOS 6.0:** Quad Core SoC enhances user convenience with an intuitive UI and updated Node JS / Chromium version for web-app integration.
- **Remote Management:** Web-based content solution provides complete access to current and historical data for real-time monitoring and control.
- **Wide Operating Temperature:** Operates reliably from 0°C to 40°C.
- **Conformal Coating:** Protects against dust, metal particles, moisture, and other contaminants for long-term reliability.
- **Upgraded Quiet Mode:** Operates quietly at 2,500 nits with minimal fan noise.
- **Installation Tools:** Equipped with a Leveler Tool and Horizontal Sensor Tool for precise installation.

The LG XS4P series offers advanced technical solutions for cost-effective operations, maintaining high brightness with lower power consumption. Its ability to manage frequently changing promotional content effortlessly makes it an excellent choice for businesses looking to attract customers. The conformal coating provides durability, ensuring the display remains reliable in various conditions.

LG is a global leader in providing innovative display solutions, committed to delivering superior picture quality and advanced technology.

Attract Passing Customers with a Bright Display Presented Through a Window

World's First UL Verification for Display Anti-Discoloration Characteristics

By focusing on the pain points of our customers, we obtained the world's first UL Verification for Display Anti-Discoloration Characteristics. Our new technology helps prevent 'screen-yellowing', while safeguarding display quality and performance stability.

Window-facing Display

LG offers advanced technical solutions for cost-effective operations. The XS4P can maintain an astonishing brightness of 4,000 nits, yet has lower power consumption compared to RGB panels at the same brightness level.

Brightness Beyond the Window

A window-facing display requires higher nits, as it is exposed to direct sunlight through a window. The XS4P is designed especially for window-facing environments, providing brilliant brightness. Vibrant and dynamic content displayed through the window will attract customers to your business, despite the viewers wearing polarized sunglasses.

High-performance with webOS 6.0

Quad Core SoC (System-on-Chip) can execute several tasks at the same time without a separate media player. In addition, webOS 6.0 platform enhances not only user convenience with intuitive UI but also web-app integration with updated Node JS / Chromium version.

Remotely Managed, Real-time Mastery (Content Manager)

A significant advantage of window-facing displays over temporary displays is their ability to effortlessly manage frequently changing promotional content and pricing information. LG's web-based content solution is intuitive and user-friendly, providing users with complete access to current and historical data anytime, anywhere, through their mobile devices. This allows users to monitor, adjust, and control the unit remotely in real-time.

Wide Range of Operating Temperature

The XS4P can be used under a wide range of operating temperature from 0°C to 40°C.

Conformal Coating

The conformal coating with dust protection shields the circuit and power boards from dust, metal particles, moisture, and other contaminants, providing solid durability and long-term reliability.

Upgraded Quite Mode

The XS4P addresses concerns about display noise. It features an Upgraded Quiet Mode that operates at 2,500 nits with minimal fan noise.

Professional Content Partners

Pairing the XS4P Series with LG SW solutions would enhance its utilization.

Convenient Installation with Calculated Precision

The XS4P is equipped with a Leveler Tool that shows users the tilt of the device, allowing for precise display installation. Additionally, the Horizontal Sensor Tool assists users in verifying the correct installation direction. The XS4P even provides warning messages for proper installation if it is installed incorrectly.
