

Graphics Card PNY RTX PRO 6000 Blackwell Max-Q Workstation Edition NVIDIA 96 GB GDDR7

Modelis: VCNRTXPRO6000MQ-SB

Gamintojas: PNY TECHNOLOGIES

EAN: 3536403403386

Prekės kodas: 585476

23,442.99€

PNY RTX PRO 6000 Blackwell Max-Q Workstation Edition NVIDIA 96 GB GDDR7 Graphics Card

The PNY RTX PRO 6000 Blackwell Max-Q Workstation Edition is a high-performance graphics card designed for professional workstations. It features 96 GB of GDDR7 memory and a 512-bit memory bus, providing exceptional memory bandwidth of up to 1792 GB/s. This graphics card supports a maximum resolution of 7680 x 4320 pixels and can simultaneously drive up to four displays via its

DisplayPort 2.1b outputs.

Features:

- **96 GB GDDR7 Memory:** Provides ample memory for large datasets and complex models.
- **512-bit Memory Bus:** Ensures high memory bandwidth for rapid data transfer.
- **DisplayPort 2.1b:** Supports the latest display technology for high-resolution output.
- **CUDA Cores:** Features 24064 CUDA cores for accelerated computing.
- **NPU Performance:** Delivers up to 3511 TOPs of NPU performance for AI and machine learning tasks.
- **PCI Express x16 5.0:** High-speed interface ensures optimal performance.
- **Active Cooling:** Equipped with a single fan for efficient thermal management.

This workstation graphics card also supports the latest technologies, including DirectX 12.0, OpenGL 4.6, and OpenCL 3.0. With a thermal design power (TDP) of 300 W, it requires a 1x 16-pin supplementary power connector. The card's compact dimensions (266.7 mm length and 111.8 mm height) and dual-slot design make it suitable for a variety of workstation configurations.

The PNY RTX PRO 6000 is ideal for professionals in fields such as video editing, 3D rendering, data science, and AI development. Its advanced features and high performance enable users to tackle the most demanding tasks with ease.

PNY Technologies is a leading manufacturer of graphics cards and memory solutions, known for their reliability and high performance.
