Aprašymas

Stress resistant

The best materials are used in the case and make this 3.5" hard disk solution the ideal partner for extreme loads. The Back Plane with its lockable bays is also ideally equipped for security requirements.

Cool and silent

The active 80x80 mm fan works efficiently and adapts the temperatures as needed, keeping the case fairly quiet. But also the processed Aluminium contributes to the passive convection to the environment.

Realtime

Optical and acoustic signals report the current status of the hard disks and the fan at all times. The alarm temperature for the signal can be set to

three levels (55° C, 60° C, 65° C).
