Pagrindinės savybės

- ✓ Complete upgrade kit for Raceline pedal set, with Load Cell brake pedal.
- ✓ Next-generation, super-precise Load Cell sensor: 220 lb / 100 kg capacity and 24-bit resolution.
- ✓ Adjustable pressure force: 3 springs, 1 elastomer buffer and 1 adjustment knob.
- ✓ Customized settings via T598 Race Dash screen or My Thrustmaster Panel software.
- ✓ Sturdy, 100% metal upgrade and fully modular.

Aprašymas

Ultimate upgrade with Load Cell sensor:

- Complete kit: includes 1 Load Cell brake pedal, 3 springs, 1 elastomer buffer, 1 metal top plate for 3 pedals, 2 anthracite grey metal pedal heads for the clutch and accelerator. Transform your Raceline pedal set into a Raceline Pedals III LC pedal set.
- Load Cell: brake pedal with Load Cell sensor measuring pressure rather than travel, for greater realism and control, with maximum pressure capacity of 220 lb / 100 kg.
- High sensitivity: Load Cell sensor with 24-bit resolution to accurately transmit every gram of pressure applied over an 11° travel angle, for ultra-sensitive, high-performance braking.

Every driver is unique:

- Full configuration: advanced settings accessible directly via the T598 Race Dash screen, or using the My Thrustmaster Panel software on PC — travel distance, dead zone, response curves (EQUALIZER).
- Adjustable pressure force: 4 versatile configurations (3 springs and 1 elastomer buffer included) to adjust the maximum pressure force between 55 – 220 lb / 25 – 100 kg without any tools, plus preload knob to fine-tune the adjustment in increments of ± 11 lb / 5 kg. For use on a desk/table, cockpit* or Wheel Stand Pro* racing stand, and customizable for each driver.
- Modular pedal set: adjust the spacing between the pedals, the height of the pedal heads, remove the clutch pedal, and find the perfect position for your driving style.
- Grip for all types of surfaces: in addition to the standard attachment holes for a cockpit, non-slip pads are included so that you'll never lose control — no matter what type of floor surface you're on.

Extensive compatibility:

- Improved compatibility via RJ45 on the T598 racing wheel: direct adjustment via the Race Dash screen.
- On game consoles: compatible with Thrustmaster Force Feedback racing wheel bases¹ using the triple 3.5 mm jack to RJ12 cable (included in the box).
- On PC: compatible with all brands of racing wheel bases via a direct USB connection to the PC.

Techninė specifikacija

Specifications	
Sandėlio grupė	Joysticks/-pads/-wheels [+0][-0]
Features	
Product type	Pedal
Product colour	Black
Max range of pressure sensor	100 kg
Compatible products	Thrustmaster Raceline
