Pagrindinės savybės

- ✓ Rapid 30 litre/minute inflation up to 10.3 bar with intuitive finger control
- ✓ Handy, compact pump with continuous measurement via an illuminated manometer
- ✓ On-board storage: Various adapters are neatly held in the tool front
- ✓ Inflates larger objects with high-pressure requirements, such as tyres and balls
- ✓ Illuminated valve area and battery status indicator

Aprašymas

Get pumping: Inflate tyres and balls in no time with the cordless UniversalPump 18V

It’s a piece of cake: The UniversalPump 18V is all you need when it comes to rapid inflation—up to 30 litres per minute — intuitive use and convenience. As a cordless tool, it can be used anywhere, on car and bike tyres or on other inflatables, and it’s quickly put into action with simple finger control thanks to a speed trigger. An illuminated manometer displays pressure measurements clearly: That’s convenient in dim lighting conditions. When the job is done, all accessories and the hose can be stored directly in the tool front. The tool belongs to the POWER FOR ALL ALLIANCE. One battery can operate a large variety of tools from different brands.

- Pumps up car tyres for travel and maintenance
- Ideal for optimising motocross tyre pressure
- Bike tyres are road ready in no time
- Top scoring with firmly pumped footballs
- Quick inflation of flat wheelbarrow tyres
- Blow up all the pool floats with ease

Easy monitoring of pressure level

The illuminated manometer provides continuous pressure measurements that are clearly visible, even in bad light conditions.

Flexible use with long, 67-cm hose length

The textile-covered pump hose delivers additional flexibility and convenience on the job. Thanks to its 67-cm length, users can pump from a comfortable, upright position.

Perfectly prepared for any task

The integrated accessory storage holds the most common adapters (ball needle, French valve adapter, balloon adapter), neatly stored in one compartment.

Full vision day or night

The integrated LED light facilitates pumping in poor light conditions, ensuring optimal inflation.
