Pagrindinės savybės

- ✓ Apply to Keystone Jacks less than 17.2 mm width
- ✓ Carbon steel housing 221 x 113 x 44.5 mm
- ✓ 180 Degree cable configuration with strain relief
- ✓ For desktop use or surface mounting
- ✓ Suitable for DIN Rail mounting when using item MP0049
- ✓ Color: RAL7035 light grey

Aprašymas

LogiLink's shielded keystone patch panels are specifically designed for modular Cat.6A 10GE cabling. The metal housing with additional shielding plate can be placed on any table or wall surface. All Keystone modules with a narrow design, for example LogiLink's Cat.6A Keystone Jack NK4000, are suitable for installation. The strain relief on the back of the device ensures high stability. Together with LogiLink's DIN rail brackets MP0049, the device can also be mounted on any standard 35 mm DIN rail.
