

Bramka MOES MZHUB ZigBee/Matter/Thread

Modelis: MZHUB-MS

Gamintojas: MOES

EAN: 6974246478388

Prekės kodas: 597498

58.00€

MOES MZHUB ZigBee/Matter/Thread Gateway

Managing a smart home can be simple and convenient when all devices operate within a single, cohesive ecosystem. The MOES MZHUB gateway combines ZigBee, Matter, and Thread standards, offering a stable wired connection, broad compatibility with popular platforms, and the ability to support up to 128 devices simultaneously. It provides remote control, voice control, and reliable long-range communication, allowing you to control your home from anywhere. This solution integrates various technologies and simplifies the daily use of smart systems.

Unlimited Integration

Support for the Matter protocol allows you to use a single gateway in conjunction with many popular platforms, such as Apple HomeKit, Google Assistant, SmartThings, and Amazon Alexa. This lets you control compatible devices in a way that best suits your usage style. Whether you use a mobile app or voice commands, everything remains under your full control. However, it's worth noting that

integrating devices operating on different protocols currently requires the use of third-party apps.

Control Center for ZigBee

The gateway also functions as an advanced ZigBee gateway, allowing you to connect up to 128 devices in a single system. This enables you to create an extensive network of smart devices (from lighting and outlets to sensors) and manage them in an organized and convenient manner. Communication between devices occurs without unnecessary delays, which translates to greater user comfort and better system responsiveness.

Stability That Makes a Difference

The use of a wired network connection significantly impacts the performance of the entire system. The gateway maintains a stable connection without the risk of frequent disconnections, which is crucial for home automation. Constant communication enhances data security and ensures the smooth operation of all connected devices, eliminating issues typical of less stable wireless solutions.

Control from anywhere

Remote device management and voice control ensure that you have control over your smart home whenever you need it. The operating range extends up to 35 meters indoors and up to 200 meters outdoors, allowing for convenient use of the system in various conditions. Whether you want to turn on a light, check the status of devices, or trigger an automation scene, everything happens quickly, intuitively, and without unnecessary complications.

Included

- gateway
- network cable
- power cable
- user manual

Manufacturer	MOES
Model	MZHUB
Input power	5 V = 1 A (DC)
Operating temperature	—10°C to +45°C
Operating humidity	10%–90% relative humidity (non-condensing)
Standby power consumption	0.5 W
Network port	10/100 Mbps Ethernet
Product dimensions	90.0 x 90.0 x 23.0 mm
Weight	Approx. 74.5 g
Wireless protocol	ZigBee, Thread
Frequency range	2.4–2.483 GHz
RF output power	13 dBm
